ART MEDIA

Charcoal / Chalk / Graphite

Milliken™

INSPIRED. INSPIRING.

Art Media is a library of patterns reinterpreting iconoclastic modern art techniques and media: *Drip Painting*, *Action Painting*, *Charcoal*, *Chalk*, *Graphite*, and the optical illusions of *Op Art*. Exploring the boundaries of Art Media and Media Art, the floor plane becomes a canvas for larger-than-life installation art or fine detail that feels like an intimate secret through the use of advanced digital technology.

Designed by Cresta Bledsoe, Art Media consists of 6 patterns that offer a variety of quintessential modern art aesthetics in a range of scales that are completely versatile—from large focal point installation to neutral and planar, textural ground. The optional *canvas* accessory patterns can act as a border or a transition.

Graphite in Dove Grey, monolithic tile installation

Graphite in Dove Grey, monolithic tile installation

Chalk in Dove Grey with *canvas right* accessory pattern, monolithic tile installation

Each art technique was originally used to have a response to the canvas in a different manner—simplified forms of abstraction, fluid continuous lines, no defined positive or negative space, and playing with the figure-ground relationship. Here we treat the floor plane as a giant canvas where installation size has no limitation, allowing the viewer to respond to 'space' in a new and different manner.

Charcoal Precision Layout

Charcoal is a 4-tile precision set pattern repeat that perfectly achieves drama through large scale pattern. This product is labeled numerically 1-4 on the back of each tile and comes with an installation pattern repeat diagram to ensure all tiles are placed in the appropriate location.

Additionally, as an optional accessory or trim tile, *Charcoal canvas left* or *canvas right* patterns, which feature the perimeter of the artwork where the charcoal fades to the *canvas* edge, are available. This creates opportunities to define circulation, create a white space edge to transition to other modular flooring, or as edge detail to transition to hard surface floor. The pattern consists of a companion *right* or *left* version tile, for all 4 of the tiles. These *canvas* edge tiles are to be installed precisely paired with their corresponding tile.

canvas left
4 *canvas* tiles to precision pair with Charcoal tile #1-4 (tiles 3 & 4 not shown)

Charcoal
4-tile precision set pattern

canvas right
4 *canvas* tiles to precision pair with Charcoal tile #1-4 (tiles 1 & 2 not shown)

A detailed floor plan is recommended for all installations using the canvas accessory tile. Milliken is pleased to offer assistance with this plan and the tile diagram for your project.

Chalk

Random Layout

Graphite

Random Layout

Chalk is a random multi-tile repeat. Each tile has edge-to-edge pattern match with unique tile centers. The variety in this design makes each installation one-of-a-kind without additional floor plans or special installation instructions. This design is to be installed random monolithic from the delivery container.

Additionally, as an optional accessory or trim tile, Chalk *canvas left* or *canvas right* patterns, which feature the perimeter of the artwork where the chalk fades to the *canvas* edge, are available. The pattern consists of a two tile repeat, to achieve a randomized effect. These are to be installed randomly along an area to define circulation, create a white space edge to transition to other modular flooring, or as edge detail to transition to hard surface flooring.

canvas left
2-tile random repeat

canvas right
2-tile random repeat

Chalk
9-tile random repeat

Graphite is a random multi-tile repeat. Each tile has edge-to-edge pattern match with unique tile centers. The variety in this design makes each installation one-of-a-kind without additional floor plans or special installation instructions. This design is to be installed random monolithic from the delivery container.

Additionally, as an optional accessory or trim tile, Graphite *canvas left* or *canvas right* patterns, which feature the perimeter of the artwork where the pencil fades to the *canvas* edge, are available. The pattern consists of a two-tile repeat, to achieve a randomized effect. These are to be installed randomly along an area to define circulation, create a white space edge to transition to other modular flooring, or as edge detail to transition to hard surface flooring.
