| Manufacturing                           |  |
|---|--|
| Manufacturing                           | Millikan's Environmental Management System is deployed in all glabal   |
| ISO 14001 Certified                     | Milliken's Environmental Management System is deployed in all global manufacturing facilities. Each facility is certified to ISO 14001 through third party auditors. This system assures continual improvement and monitoring of all key environmental impact categories and processes.  |
| OSHA VPP Sites                          | The Voluntary Protection Program (VPP) promotes effective worksite-based safety and health. In the VPP, management, labor, and OSHA establish cooperative relationships at workplaces to implement a comprehensive safety and health management system. OSHA VPP approval indicates official recognition of the outstanding efforts of employers and employees who have achieved exemplary occupational safety and health. All Milliken U.S. manufacturing locations are OSHA VPP sites. |
| Corporate Social Responsibility Actions |  |
| Carbon Negative Status                  | Carbon is one of the leading contributors to greenhouse Gas (GHG) emissions. Milliken achieves carbon negative certification from the respected Leonardo Academy without purchased Renewable Energy Credits based on renewable energy, carbon sequestration and energy reduction.  |
| ECO 360                                 | Eco 360 is Milliken's brand for sustainable products that meet rigid manufacturing standards with DfE and LCA protocols. It applies to all carpet collections.   |
| Ecountability                           | Milliken has applied strict resource conservation guidelines to all operations for more than a century. These guidelines and sustainable policies are the foundation of our Milliken & Company Sustainability Process.   |
| EPA Partnerships                        | The U.S. Environmental Protection Agency regulates, protects and educates concerning the environment. It offers many partnership opportunities for business to measure and reduce environmental impacts. Milliken participates in with SmartWay® and Landfill Methane Outreach Program (LMOP).   |
| Green Energy                            | Conventional energy sources like oil, coal and natural gas are being replaced by greener sources like wind, solar and water. Milliken seeks renewable energy to meet its needs using methane and hydropower.   |
| Reduced Packaging                       | Reduced packaging lowers waste and associated costs related to energy and transportation. Working with customers Milliken has saved more than 90 million pounds of cardboard by shipping modular carpet on pallets versus boxes, reducing packaging 91% since 1991.  |
| Reduced Environmental Footprint         | The amount of depletable raw materials and nonrenewable resources consumed to make products, added to the wastes and emissions generated in the process determine an organization's environmental impact or footprint. Through conservation and efficiency Milliken & Company has reduced its global eco-footprint 48% over the last 15 years. The Floor Covering Division has reduced its global eco-footprint by 85% during the same period.   |
| Trees for All                           | Trees have long been a passion for Milliken & Company. This initiative   |
|   | educates the supply chain, enhances communities, and reduces GHG impacts   |
|   | for future generations via tree planting; partnering to nurture trees; adding  |
|   | shade for playground safety; and recognizing sustainable actions.  |
| Zero Waste                              | All Milliken plants operate with a goal of 100% diversion or zero waste to   |
|   | landfill. The company has maintained zero waste from U.S. carpet   |
|   | manufacturing since 1999.  |

| Cantiliantiana                                |   |  |
|---|---|--|

| Cauban Nautual                                | Milliken professionally managed forests sequester more carbon dioxide than  |  |
| Carbon Neutral                                | our facilities emit worldwide. All carpet collections are certified carbon neutral  |  |
|   | by the Leonardo Academy without purchased credits.  |  |
|   | CRI's Green Label Plus program for carpet and adhesives sets scientifically   |  |
|   | based standards for Indoor Air Quality (IAQ) to ensure that customers are   |  |
| CRI Green Label Plus                          | purchasing low emitting products. All Milliken carpets meet the criteria for  |  |
|   | Green Label Plus certification. More than 90 percent of Milliken products are   |  |
|   | rated for "Severe Wear" (highest rating for appearance retention) by the Carpet   |  |
|   | and Rug Institute.  |  |
|   | The ANSI/NSF 140-2007 Sustainable Carpet Assessment (NSF-140) is intended   |  |
|   | for commercial, hospitality, and similar carpets. Reliable third-party verification   |  |
|   | from reputable auditors provides assurance that product expectations are met.   |  |
| NSF 140 – 2007e                               | California standards have been incorporated into the final ANSI/NSF 140-2007  |  |
|   | standard at Platinum certification levels. All Milliken commercial carpet   |  |
|   | collections are certified under the NSF 140-2007 Sustainable Carpet Assessment  |  |
|   | Standard.   |  |
|   | The Partnership for a Sustainable Georgia assists Georgia businesses in using   |  |
| Partnership for a Sustainable Georgia         | continuous improvement tools to reach better environmental results and a  |  |
|   | better bottom line. Milliken Floor Covering is a Gold Partner with Sustainable  |  |
|   | Georgia.  |  |
|   | SMaRT is a consensus national standard developed by MTS. SMART is approved  |  |
|   | as part of the LEED Green Building Rating System based on compliance with   |  |
| SMaRT®  | comprehensive sustainable product certification criteria. All Milliken  |  |
|   | commercial carpet collections are certified to SMaRT Consensus Sustainable  |  |
|   | Product Standards.  |  |
