

# Jive®

## Training & Multipurpose Tables

For dynamic applications where learning occurs, Jive training and multipurpose tables are easy to move and reconfigure, so people can stay focused and engaged.

HAWORTH®

## Distinctive Style and Support

With their wide range of shapes, sizes, and bases, Jive tables help support a healthy workplace through comfortable solutions that are easy to specify.

## Features

Refined, practical design features—including thoughtful color and finish options—create variety and efficient space planning for seamless integration into any environment.

**Six top shapes and two edge options (edgeband and knife edge)** – Contribute to expansive offering and design freedom in training environments; rectangle sizes range from 18" x 48" to 36" x 72".

**Three fixed-height options** – Promote a variety of postures and workstyles; heights: 29", 36", and 42" depending on top size and shape.

**C-Leg and T-Leg bases** – Designed for training applications and provide generous knee clearance. T-Leg base depths: 18", 24", 30" and 36"; C-Leg base depths: 24", 30".

**Optional flip top** – Makes storage easy for rectangular tops; only one hand is needed to engage the mechanism for easy operation.

**Optional casters and glides** – Offer leveling capability for top alignment, whether table is stationary or mobile.

## Colors, Materials, Finishes

Offered in standard Haworth laminate and wood finishes with edgeband and knife edges, allowing Jive to coordinate across the broader Haworth product platform.
