Maximize your space with X Series

Saving inches in storage adds up to meaningful and cost-efficient space planning when you're challenged to design with less square footage. X Series is the storage solution that efficiently utilizes your real estate.

Storage islands create informal/impromptu meeting spaces in open or team areas. Group and cubby lockers, especially when used with benching applications, offer high-density storage and work areas for multiple users to maximize floor space.

Personal storage towers and combination units provide a variety of functions within a single product solution.

The File Drawer Insert fits inside lateral file drawers, creating two functional levels of storage for personal belongings.

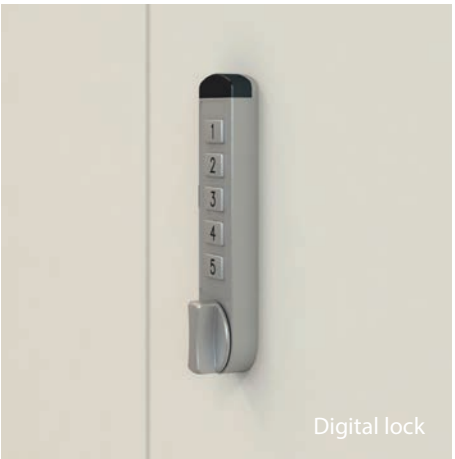

Give mobile workers a home base

X Series lockers and cubbies create a place where people can stow their work materials and personal belongings. Cubby lockers offer unique configurations that include an open shelf or drawer. Reprogrammable digital locks provide the security people desire and eliminate the need to carry keys—or replace lost ones.

A wide selection of accessories lets people express their individuality and customize the inside of their storage components as personal spaces become more compact. Optional 120V and USB power modules recharge personal electronics overnight or when not in use.
