Maarten Van Severen, 2005

.o6

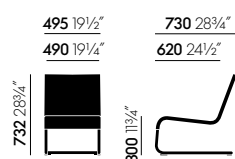

Adhering to the aesthetic stringency that characterises the designs of Maarten Van Severen, the great comfort of the .o6 lounge chair becomes apparent only upon use. The flexible shell, made of integral skin foam with integrated leaf springs in the backrest, provides a dynamic seating experience. Thanks to the stainless steel tubular frame, .o6 is also suited for outdoor use.

#### Materials

- **Backrest and seat:** flexible backrest with integrated leaf springs. Polyurethane integral foam seat shell with upholstered effect, self-supporting on a stainless steel tubular frame.
- **Base:** non-stackable cantilever base, satin or powder coated stainless steel. Fitted with plastic glides for carpet or felt glides for hard floors.
- **Use:** suitable for outdoor use.
- **Note:** special additives retard the fading of

colours due to UV radiation. However, if the chair is exposed to sunlight for prolonged periods, the colour may change over time. We recommend limited exposure to sunlight.
