Click folding table

Click is a functional and robust folding table developed by Vitra together with the engineer and designer Alberto Meda. Its legs fold up and down by simply pressing a button. Because of the flat folding mechanism and the elegant lines of the legs, Click does not look like an ordinary folding table.

The recessed folding device also allows for space-saving storage. Up to ten tables can be stacked on the trolley. Available in three sizes, Click also comes in a practical set of ten tables with a stacking trolley.

Alberto Meda

Alberto Meda lives and works in Milan. He teaches at IUAV University of Venice and lectures at leading design colleges and institutions. He has worked together with Vitra since 1994. During this time, he has created a series of office chairs and a variety of office and conference tables.
