### A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

# Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

#### Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

### The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

### **General Information**

This book is effective January 7, 2019, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www. Herman Miller.com.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest ½". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

### 20-Day or Less/Assigned Lead-Time Shipments

All products and options in this price book not designated by an Assigned Program icon <a> a</a> will ship in **20 business days or less** after being acknowledged by Herman Miller.

Products and options designated by an A are on the assigned leadtime program and may ship in 20 days, less than 20 days, or more than 20 days from order acknowledgement.

#### Description

While its iconic form has remained largely unchanged, the Aeron® chair has been remastered from the casters up to meet the needs of today's work and workers. With the help of original co-designer, Don Chadwick, we thoughtfully updated the chair based on the latest research around the science of sitting, and advancements in materials, manufacturing, and technology.

The new Aeron chair comes in 3 sizes and has a new 8Z Pellicle® material that delivers increased comfort and ergonomic support. Across the seat and back, 8 latitudinal zones of varying tension envelope the sitter, tightest at the edges and more forgiving where the body makes contact. The chair has pneumatic height adjustment and a balanced recline that lets the body naturally pivot at the ankles, knees, and hips. Tilt options include a tilt limiter that allows the user to select the tilt range to limit the amount of recline; a tilt limiter and seat angle that allows the user to select the tilt range and a horizontal or 5° forward seat angle; or a standard tilt.

Back-support options include adjustable PostureFit® SL, an adjustable lumbar support, and PostureFit. The adjustable PostureFit SL support provides a custom fit in sacral and lumbar regions of the spine that helps achieve healthier posture and improved lower back comfort. The user can fine tune the level of support with an adjustable knob on the PostureFit SL.

Arm choices include a fixed, nonadjustable option; a height-adjustable option that moves the arms 4" vertically; a height-adjustable plus pivot option that moves the arms 4" vertically and pivots the armpads 15° outward and 17 $^{1}/_{2}$ ° inward; and a fully adjustable option that also allows the armpads to move forward and back.

Aeron is now offered in a range of 3 tightly curated, holistic material expressions: graphite, carbon, and mineral. Graphite refines Aeron's original color scheme for a crisp, sculptural appearance. Carbon blurs light and dark, and warm and cool, to harmonize with a variety of environments. Mineral illuminates Aeron's finer points to offer a lightness that borders on translucence.

The graphite with graphite applique (ZB) frame finish includes appliques that are applied to an Aeron® work chair's seat, back, and arms to minimize the effect of contact between the chair and a wood-edge surface.

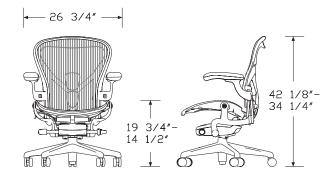

### Notes

To help determine chair size, see Aeron Chair Size/Fit Reference in Appendices. B- and C-size chairs are tested and warranted for use by persons 350 pounds and under. A-size chairs are tested and warranted for use by persons 300 pounds and under.

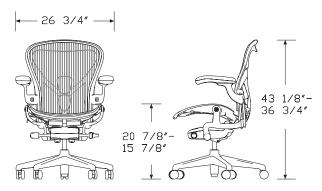

For information on casters and glides, see Casters and Glides in Appendices.

Customer's Own Leather (COL) can be applied to armpads; requires 4 square feet. See Order Information in Appendices.

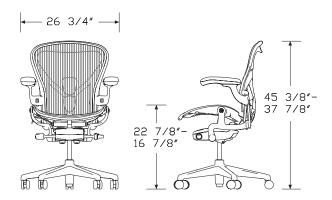

As with any material or textile, dye transfer may occur on seating surfaces, being more noticeable on lighter color expressions (for example: mineral on Aeron, fog on Mirra® 2). If this is a concern, we recommend selecting a darker color expression on which dye transfer will be less noticeable. As a reminder, dye transfer is not covered under the Herman Miller warranty.

#### Description

While its iconic form has remained largely unchanged, the Aeron® chair has been remastered from the casters up to meet the needs of today's work and workers. With the help of original co-designer, Don Chadwick, we thoughtfully updated the chair based on the latest research around the science of sitting, and advancements in materials, manufacturing, and technology.

The new Aeron chair comes in 3 sizes and has a new 8Z Pellicle® material that delivers increased comfort and ergonomic support. Across the seat and back, 8 latitudinal zones of varying tension envelope the sitter, tightest at the edges and more forgiving where the body makes contact. The chair has pneumatic height adjustment and a balanced recline that lets the body naturally pivot at the ankles, knees, and hips. Chair components are packaged and shipped ready to assemble.

Tilt options include a tilt limiter that allows the user to select the tilt range to limit the amount of recline; a tilt limiter and seat angle that allows the user to select the tilt range and a horizontal or 5° forward seat angle; or a standard tilt.

Back-support options include adjustable PostureFit® SL, an adjustable lumbar support, and PostureFit. The adjustable PostureFit SL support provides a custom fit in sacral and lumbar regions of the spine that helps achieve healthier posture and improved lower back comfort. The user can fine tune the level of support with an adjustable knob on the PostureFit SL.

Arm choices include a fixed, nonadjustable option; a height-adjustable option that moves the arms 4'' vertically; a height-adjustable plus pivot option that moves the arms 4'' vertically and pivots the armpads  $15^\circ$  outward and  $17^1/2^\circ$  inward; and a fully adjustable option that also allows the armpads to move forward and back.

Aeron is now offered in a range of 3 tightly curated, holistic material expressions: graphite, carbon, and mineral. Graphite refines Aeron's original color scheme for a crisp, sculptural appearance. Carbon blurs light and dark, and warm and cool, to harmonize with a variety of environments. Mineral illuminates Aeron's finer points to offer a lightness that borders on translucence.

The graphite with graphite applique (ZB) frame finish includes appliques that are applied to an Aeron® work chair's seat, back, and arms to minimize the effect of contact between the chair and a wood-edge surface.

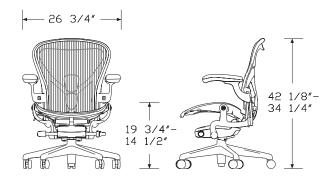

#### Notes

To help determine chair size, see Aeron Chair Size/Fit Reference in Appendices. B- and C-size chairs are tested and warranted for use by persons 350 pounds and under. A-size chairs are tested and warranted for use by persons 300 pounds and under.

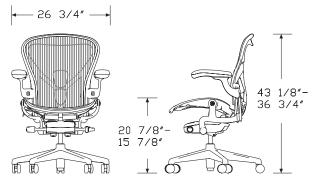

For information on casters and glides, see Casters and Glides in Appendices.

Customer's Own Leather (COL) can be applied to armpads; requires 4 square feet. See Order Information in Appendices.

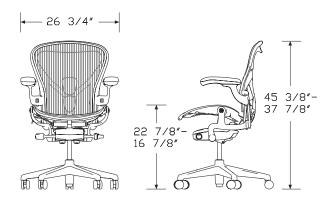

Note: As with any material or textile, dye transfer may occur on seating surfaces, being more noticeable on lighter color expressions (for example: mineral on Aeron, fog on Mirra® 2). If this is a concern, we recommend selecting a darker color expression on which dye transfer will be less noticeable. As a reminder, dye transfer is not covered under the Herman Miller warranty.

#### Description

While its iconic form has remained largely unchanged, the Aeron® chair and work stool has been remastered from the casters up to meet the needs of today's work and workers. With the help of original co-designer, Don Chadwick, we thoughtfully updated the chair and work stool based on the latest research around the science of sitting, and advancements in materials, manufacturing, and technology.

The new Aeron stool has a new 8Z Pellicle® material that delivers increased comfort and ergonomic support. Across the seat and back, 8 latitudinal zones of varying tension envelope the sitter, tightest at the edges and more forgiving where the body makes contact. The work stool has a 2½"-wide footrest platform that provides three times more surface area than a typical footring to reduce pressure and increase comfort. Non-slip treads offer added stability. When adjusting stool height, the footrest moves with the seat.

The stool has a 5-star base, pneumatic seat-height adjustment, and 2 height options to allow stool use with counter or bar height surfaces. The low stool has a seat-height range of  $24^3/4''$  to  $29^1/4''$  with a footrest that adjusts  $2^1/2''$  (from 15" to  $17^1/2''$  below the seat) and is optimal for work surfaces between 34" and 38" high. The high stool has a seatheight range of 28" to  $34^1/4''$  with a footrest that adjusts  $5^3/4''$  (from 15" to  $20^3/4''$  below the seat) and is optimal for work surfaces between 37" and 43'' high. Stool is available in size B.

Tilt options include a tilt limiter that allows the user to select the tilt range to limit the amount of recline; a tilt limiter and seat angle that allows the user to select the tilt range and a horizontal or 5° forward seat angle; or a standard tilt.

Back-support options include adjustable PostureFit® SL, an adjustable lumbar support, and PostureFit. The adjustable PostureFit SL support provides a custom fit in sacral and lumbar regions of the spine that helps achieve healthier posture and improved lower back comfort. The user can fine tune the level of support with an adjustable knob on the PostureFit SL.

Arm choices include a fixed, nonadjustable option; a height-adjustable option that moves the arms 4" vertically; a height-adjustable plus pivot option that moves the arms 4" vertically and pivots the armpads 15° outward and 17 $^{1}/_{2}$ ° inward; and a fully adjustable option that also allows the armpads to move forward and back.

Aeron is now offered in a range of 3 tightly curated, holistic material expressions: graphite, carbon, and mineral. Graphite refines Aeron's original color scheme for a crisp, sculptural appearance. Carbon blurs light and dark, and warm and cool, to harmonize with a variety of environments. Mineral illuminates Aeron's finer points to offer a lightness that borders on translucence.

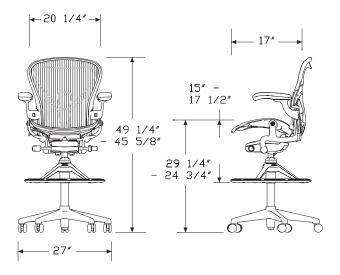

The graphite with graphite applique (ZB) frame finish includes appliques that are applied to an Aeron® work stool's seat, back, and arms to minimize the effect of contact between the stool and a wood-edge surface.

### Notes

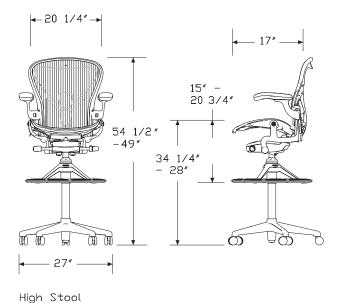

For information on casters and glides, see Casters and Glides in Appendices.

Customer's Own Leather (COL) can be applied to armpads; requires 4 square feet. See Order Information in Appendices.

As with any material or textile, dye transfer may occur on seating surfaces, being more noticeable on lighter color expressions (for example: mineral on Aeron, fog on Mirra® 2). If this is a concern, we recommend selecting a darker color expression on which dye transfer will be less noticeable. As a reminder, dye transfer is not covered under the Herman Miller warranty.

The adjustable PostureFit SL support provides a custom fit in sacral and lumbar regions of the spine that helps achieve healthier posture and improved lower back comfort. The user can fine tune the level of support with an adjustable knob on the PostureFit SL.

Arm choices include a fixed, nonadjustable option; a height-adjustable option that moves the arms 4" vertically; a height-adjustable plus pivot option that moves the arms 4" vertically and pivots the armpads 15° outward and 17 $^{1}/_{2}$ ° inward; and a fully adjustable option that also allows the armpads to move forward and back.

Aeron is now offered in a range of 3 tightly curated, holistic material expressions: graphite, carbon, and mineral. Graphite refines Aeron's original color scheme for a crisp, sculptural appearance. Carbon blurs light and dark, and warm and cool, to harmonize with a variety of environments. Mineral illuminates Aeron's finer points to offer a lightness that borders on translucence.

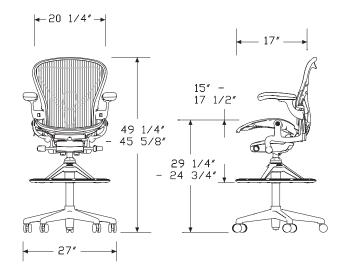

The graphite with graphite applique (ZB) frame finish includes appliques that are applied to an Aeron® work stool's seat, back, and arms to minimize the effect of contact between the stool and a wood-edge surface.

#### Notes

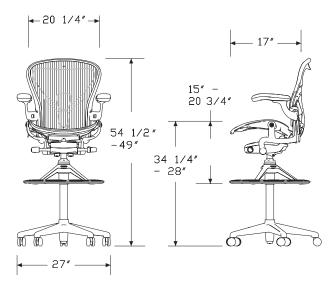

For information on casters and glides, see Casters and Glides in Appendices.

Customer's Own Leather (COL) can be applied to armpads; requires 4 square feet. See Order Information in Appendices.

As with any material or textile, dye transfer may occur on seating surfaces, being more noticeable on lighter color expressions (for example: mineral on Aeron, fog on Mirra® 2). If this is a concern, we recommend selecting a darker color expression on which dye transfer will be less noticeable. As a reminder, dye transfer is not covered under the Herman Miller warranty.

# Product Information

### Description

This adjustable PostureFit® SL support fits on the back of an A, B, or C size new Aeron® work chair. It provides custom, adjustable support in the lower back area, or sacrum, that helps achieve healthier posture and improves lower back comfort. Adjustable PostureFit SL also provides support in the lumbar region of the spine. User can adjust the level of support by dialing the support in or out. Adjustable PostureFit SL ships with the support and includes a new backrest. This requires an installer to modify the existing chair.

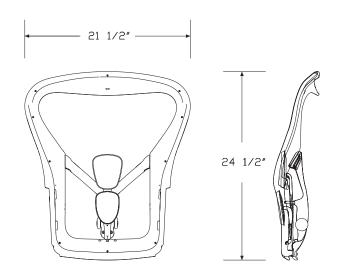

Graphite (G1) finish is recommended for use with the following frame finishes:

- Graphite (G1)
- Graphite with graphite applique (ZB)

Carbon (CRB) finish is recommended for use with carbon (CRB) frame finish.

Mineral (VPR) finish is recommended for use with mineral (VPR) frame finish.

### Description

This frame applique is applied to a new Aeron® work chair's seat, back, and arms to minimize the effect of contact between the chair and a wood-edge surface. The seat and back appliques attach with the chair's existing screws. Coated arm yokes replace existing arm yokes. Arm components are preassembled. The arm yokes use the chair's existing armpads.

# Notes

Frame applique does not meet CAL 133 requirements.

HermanMiller

This reference helps people select A-, B-, or C-size chairs when the three sizes are not available for actual test sitting. Height and weight are key indicators of suitable chair-size choice. Since the B-size chair is designed to fit a broad range of people, Herman Miller recommends it for users who fall in the A/B or B/C category. This chart applies to New Aeron chairs with the extended-height-range pneumatic height-adjustment cylinder.

To determine which chair size is best, find the point of intersection for your height and weight. New Aeron B-, and C-size chairs are tested and warranted for use by persons 350 pounds and under. A-size chairs are tested and warranted for use by persons 300 pounds and under.

Weight (Pounds)

HermanMiller November 2016

## Fire Retardancy — Seating

## Fire Retardancy

Fire-retardant chairs manufactured in approved fabrics (FR) meet California TB 133 requirements.

All foam and textiles on HermanMiller seating products comply with California TB 117-2013.

To meet California TB 133 code requirements, fabrics must be applied to approved chairs identified with FR product numbers.

HermanMiller February 2019

## Customer's Own Material/Customer's Own Leather Order Information — Seating

## Packaging

Packaging varies according to individual product. A surcharge may be added for special packaging requests. Contact Customer Care for specific information.

## Customer's Own Material/Customer's Own Leather

## **Program Overview**

The Customer's Own Material (COM) and Customer's Own Leather (COL) program gives you the option of using textiles other than those listed. Herman Miller will test textiles for application to Herman Miller products and will process orders for those with approved COM/COL textiles only. COM/COL are assigned lead-time textiles.

Omni lists an overview of fabrics and leathers that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for COM/COL is listed below. Questions about the COM/COL program and requests for assistance may be directed to your COM representative at:

(616) 654 3400

(866) 854 3048 ext 6543400

## Customer's Own Material/Customer's Own Leather Warranty

Herman Miller does not warrant COM/COL textiles. COM/COL textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM/COL textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

## Customer's Own Material/Customer's Own Leather Pricing

COM is a Category 1 fabric. There are no application charges for COM fabrics. COL is a Category 7 textile; refer to prices on specific products to determine the application charge.

Ordering and payment for COM/COL textile yardage are the responsibility of the customer and the textile supplier.

If desired, Herman Miller will purchase COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles to simplify ordering and shipment. For this service, refer to the Supplier Connection program.

## **Textile Approval**

- 1. Select a COM/COL textile and a Herman Miller product.
- 2. If your textile is not listed in Omni, obtain a test number from a COM representative at (616) 654 3400. You can also submit your request within Omni. Please have the following information ready before calling: textile name, number, pattern, roll width, and the product you will apply it to.

Additional yardage may be needed due to the unique characteristics of a textile. All package labels must include the words "COM test" or "COL test" and the assigned COM/COL test number.

Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

## Ordering Products with COM/COL

- Refer to the specific products to determine the yardage required for COM/COL textiles.
- 2. If your textile is not listed in Omni, call a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400. The representative will assign an identification number for your textile (ID#) and will verify yardage requirements for your order. Additional yardage may be needed due to the unique characteristics of a textile.
- 3. Enter your order on Order Manager in Omni.
- 4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
- 5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the seating products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400.

Products will be scheduled for production when COM/COL textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

HermanMiller April 2017

## Customer's Own Material/Customer's Own Leather Order Information — Seating

continued

## Supplier Connection

## **Program Overview**

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:

(616) 654 3400

(866) 854 3048 EXT 6543400

## **Supplier Connection Warranty**

Textiles purchased by Herman Miller through the Supplier Connection program are COM and are not warranted by Herman Miller. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

## **Supplier Connection Pricing**

Textiles purchased by Herman Miller through the Supplier Connection program are COM. COM is a Category 1 fabric. There are no application charges for COM fabrics.

Payment for textiles purchased by Herman Miller through the Supplier Connection program is the responsibility of the customer or dealer. Herman Miller will invoice the order at the supplier's prices published at the time of the order.

## **Textile Approval**

- 1. Refer to Omni to identify the approval status of the textile. If your textile is not listed, contact the COM Department to request testing for application to Herman Miller products.
- 2. Herman Miller will notify you of approval or disapproval in approximately 4 days from receipt of the test yardage. If the textile is approved, it will be assigned a COM identification number.

## **Ordering Products with Supplier Connection COM**

- 1. Identify and include the following information on your purchase order:
  - · Product number and option
  - Herman Miller's COM identification number
- 2. Enter your order on Order Manager in Omni.
- 3. Upon receipt of the purchase order, Herman Miller will process your order and send you a PO acknowledgment. Herman Miller will determine the yardage required to produce your product and will order and schedule for delivery the required textile. Standard lead times in effect at the time the textile is allocated at the supplier will apply to products ordered through this program.

Distribution Rights

Working together since 1956, Herman Miller and Vitra are the authentic sources of designs by Charles and Ray Eames, Alexander Girard, and George Nelson. All the designs shown in this book are protected by law. Herman Miller has obtained all rights to make and sell these designs. Also, Herman Miller holds exclusive worldwide manufacturing and distribution rights for these products with the following exceptions:

Charles and Ray Eames, George Nelson, and Alexander Girard—Worldwide distribution rights for furniture in all areas except Europe and the Middle East. For those areas, please contact Vitra.

Isamu Noguchi—Worldwide distribution rights for the Noguchi Rudder Table. Distribution rights for the Noguchi Table in North America and Central America only. For all other areas, please contact Vitra.

Magis—Exclusive distribution rights in the US and Canada. For all other areas, please contact Magis.

Mattiazzi — Exclusive distribution rights in the US and Canada. For all other areas, please contact Mattiazzi.
