

## Above Surface Panel to Panel Jumper Installation

### Tools Required

- N/A

### Hardware Required

- 1-Pass Through Or Electrical Kit
- 1-Panel to Panel Jumper

### Installation

1. Unpack panel to panel jumper. (Take care to insure that proper jumper is used as specified by both the floor and elevation plan views.)
2. Insure that Either the electrical kit or pass through kits is already installed.
3. Pass through and frame assembly needs to be completed before going on.
4. Install the pass through as shown in Figure A below.
5. Immediately following this, install (Panel to Panel jumper)/(Connector Jumper).
