### Ordering C.O.M., C.O.L., and C.O.V.

#### Customer's Own Material

Specifications Form January 2017

All fabrics, including COM, COL, KOM and in grades will be applied at the factory's discretion. If a pattern or stripe is to be applied in a certain direction, the customer MUST specify this in writing on the P.O. and attach a sample of the fabric with it running in the application direction to the P.O. Specifying fabric direction may increase the amount of COM or KOM yardage required. Check with KI Customer Service to see if an increase in yardage is necessary BEFORE specifying, ordering and sending COM and COL to the factory or having KOM quoted.

ALL C.O.M AND C.O.L SHIPMENTS

MUST BE PREPAID TO:

217 Feld Avenue High Point, NC 27263

COM and COL must be identified as follows:

- I. Name and address
- 2. Your purchase order number
- 3. Our style number to which fabric is to be applied
- 4. Supplier name and fabric name, number, and color

COLLECT SHIPMENTS WILL BE REFUSED.

SHIPMENT SCHEDULE WILL BE GIVEN WHEN ALL FABRIC IS RECEIVED FOR ENTIRE ORDER

YARDAGE REQUIREMENTS LISTED IN PRICE LIST ARE BASED ON PLAIN GOODS 54" WIDE. Fabrics less than 54" wide, or those requiring matching (stripes, plaids, prints, large patterns) will require additional yardage based on the fabric used and the item ordered. CONSULT MATRIX BELOW FOR ADDITIONAL YARDAGE NEEDED.

C.O.M. INCREASE MATRIX (The yardage matrix is also applicable to any reservations of KI Ingrade, Pallas, or KOM upholsteries).

This table is a general guide.

FABRIC WIDTH	PLAIN FABRIC	UNDER 7" REPEAT	8"-13" REPEAT	14"-21" REPEAT	22"-27" REPEAT	28"-33" REPEAT	34"-40" REPEAT	41"-48" REPEAT
54"	0	20%	25%	30%	45%	55%	70%	80%
51"-53"	15%	25%	30%	35%	50%	60%	80%	90%
48"-50"	20%	30%	35%	40%	55%	65%	85%	95%
45"-47"	30%	45%	50%	55%	60%	80%	90%	100%
36"-44"	50%	65%	70%	75%	80%	100%	110%	120%

FABRIC WITH DOUBLE REPEAT: IF USING A FABRIC WITH A DOUBLE REPEAT, PLEASE FOLLOW THIS FORMULA: TAKE THE TOTAL AMOUNT OF THE LARGER AND HALF OF THE SMALLER REPEAT; ADD TOGETHER TO FIND THE CORRECT OVERALL REPEAT. EXAMPLE: 10" VERTICAL WITH 14" HORIZONTAL WOULD BE 14+5=19.

IF FABRIC COMES IN ON MULTIPLE ROLLS. ONE ADDITIONAL YARD PER ROLL NEEDS TO BE ADDED TO THE YARDAGE REQUIREMENT.

SPECIAL NOTE: WE CAN ASSUME NO RESPONSIBILITY FOR THE DURABILITY OR TAILORING QUALITY OF CUSTOMER  $FURNISHED\ COVERINGS\ (C.O.M.)\ OR\ KOM.\ KOM:\ is\ fabric\ that\ KI\ will\ purchase\ for\ you\ at\ jobber's\ price\ (net)\ plus\ a\ nominal\ charge$ for handling, shipping, and managing.

### Ordering C.O.M., C.O.L., and C.O.V.

#### Customer's Own Material ■

Specifications Form January 2017

#### ADDITIONAL NOTES:

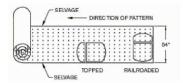

- Orders cannot go into production without the information listed at right.
- Attach memo sample to this approval sheet.
- If your order has been placed, list PO#
- The cost of the COM sample will be paid by the client.
- Even after preliminary approval, KI reserves the right to reject COM/COL if necessary when the quality is not satisfactory for the product to be upholstered. KI assumes no responsibility for its overall appearance, flammability, durability, color fastness or any other quality after upholstered on a KI product.

#### ALL COM MUST BE APPROVED.

VOLID CONTRACTOR IN A LANGE

Photocopy this form and submit with COM fabric for approval:

(This fabric approval is for the purpose of advising how to apply your COM fabric, verify yardage required, and suitability.)

### Connection Zone® Benching

General Information

#### **Connection Zone Benching General Information**

The Connection Zone Collection offers well-designed efficiency in space planning, supporting the focused work of an individual, the collaborative process of a group interaction, or the temporary needs of a touch-down space.

Connection Zone Benching is ideal for high density planning. Smaller footprints bring more users into a space and reduce per-user costs, while its simple design supports multiple planning styles. Privacy screens, dividers and optional modesty panels enable users to define personal space and establish a higher degree of privacy while maintaining an open, collaborative environment.

Connection Zone Benching is designed to withstand the rigors all markets. From its frame to screens, to storage, it is built to last.

Connection Zone Benching offers three distinct planning styles.

- Basic workstations, with 29" nominal finished height, for traditional benching applications in single- and dual-sided planning styles
- Café height (42" nominal finished height) single-sided and teaming tables
- Work rail-based planning that allows for the attachment of supporting privacy screens, shelves, and storage elements

#### Worksurfaces

Connection Zone Benching offers a variety of worksurface shapes designed for flexible workstation planning. All are available in a wide range of sizes. Worksurfaces feature a 1-1/8" thick high density particle board core with high pressure laminate top and phenolic backing sheet. Tops are predrilled to accept bases and standard components. Total dimension is 1-1/4" thick. When attached to frames, worksurfaces will "float" above the frame.

Dual-sided applications feature two worksurfaces. When no screen is specified, worksurfaces abut one another. Optional Framed Privacy Screens are inserted between worksurfaces and are attached to the legs. Frameless Privacy Screens and Supporting Privacy Screens utilize a center work rail that separates the worksurfaces. Overhang of worksurface will vary by configuration and screen use.

74P and Knife edge styles are available and grommet locations may be specified for most worksurfaces. Knife edge use is restricted to the edge facing the occupant.

Worksurface options for 29" finished height applications include:

- Rectilinear
- Peninsula
- · Extended Corner
- Return
- Adjoining
- Conference End
- · Elliptical

Rectilinear worksurfaces for 29" finished height dual-sided applications may be specified with an optional sliding feature to facilitate cable routing at installation.

Worksurface options for 42" finished height applications include single-sided rectilinear tops and teaming rectilinear tops. Sliding worksurfaces are not available on 42" units.

#### Frames for 29" Finished Assemblies

Single- & dual-sided support frames provide structural support for the worksurfaces. They are available in single sided (24" & 30"depths), and dual-sided (48" & 60" depths) applications. Frames are specified as "starter" or "adder," depending upon their placement in a row. Single Sided frames support fixed worksurfaces only, while dual-sided frames support either fixed or sliding worksurfaces. All Connection Zone support beams are telescopic to allow

for support of multiple worksurface widths. Telescopic range varies by frame size; consult pricelist for details. Steel frame base support profile is 1-1/2" x 2-3/8", and a gap of 1-5/8" will be present between base structure and worksurface when assembled.

Wood leg frame base support features angled wood legs. No gap is present between worksurface and frame.

Starter models contain a set of end frames along with the necessary worksurface brackets and beam(s). These units are used as stand-alone by themselves or in conjunction with adder models to create rows of workstations.

Adder models contain a single Intermediate frame support and the necessary worksurface brackets and beam(s) to be used along with a starter model number to create rows. A typical row would contain (1) starter model and any number of adder models.

Perpendicular Support Frames are a group of parts that provide structural support for worksurfaces that are configured perpendicular to the main frame supported beams. Frames are available for support of single worksurface depths of 24" and 30" or for support of dual worksurface depths of 48" and 60". Perpendicular support frames can also be ordered as needed for reconfigurations.

Wood leg desks and conference tables include both frame and worksurface in a single model.

#### Frames for 42" Café Height" Finished Assemblies

Frames for 42"H assemblies are offered in 24" and 30" worksurface depths on single sided rows, and in 42" and 48" worksurface depths for teaming tables. Frames are specified as "starter" or "adder," depending upon their placement in a row. Starter legs for 42"H assemblies are inset from the edge of the worksurface, and adder legs span two worksurfaces. Frames include integral modesty panels which are attached to the legs for support. Modesty panels extend beyond the legs to the table edge.

Note: Fixed worksurfaces only should be specified for 42"H assemblies.

#### **Above Worksurface Framed Screens and Dividers**

Framed Screens and Dividers are constructed with an aluminum frame that provides superior strength and can be powder coated in frame matching or accent colors. The standard top rail provides a single slot that may be used to hang accessories; alternately an optional tool rail containing three slots may be specified. Insert material options include acrylic, acrylic markerboard, and tackable fabric.

Framed Screens and Dividers are offered in heights of 13" and 19" for all insert materials and in a 31" height with fabric only inserts. Single, uninterrupted screens are available in 6" increments from 24" to 78". 60", 64", 72" and 84" screens are offered with center segmentation, and 90" and 96" units are available in two or three equal segments. Privacy Screens are located flush with the bottom of the worksurfaces, run parallel with the support beam, and do not require the use of a work rail. On single-sided applications, mounting brackets are attached directly to the bottom of the worksurfaces. On dual-sided applications, mounting brackets are attached to the support frames. Divider Screens rest on top of the worksurface and run perpendicular to Privacy Screens. When used with a Privacy Screen, the Divider attaches to one end and is supported by a sliding or fixed worksurface attachment bracket on the other end. Divider screens may also be specified without Privacy Screens.

#### **Modesty Panels**

All modesty panels are 10" tall and constructed of 14 gauge steel with 1/4" diameter holes on 3/4" centers. They are

available in standard powder coat colors and are supported by brackets that attach to the underside of a worksurface.

Modesty panels for use on single-sided frames for 29" high assemblies are located flush to and inset of the frame legs. These modesty panels do not attach to the legs and are not required for structural integrity.

Modesty panels for wood leg frames are located withnn the leg span, and are always included.

Modesty panels for use on single-sided or teaming table frames for 42" high assemblies are attached to the legs and span the entire width of the worksurface with a 1/4" reveal. One modesty panel is included and required for structural integrity on single-sided applications and two modesty panels are included and required for teaming table applications.

#### **Electrical Components**

The prewired electrical is a 10-Wire 6 Circiut/6-2-2 system (UL183): (6) not wires, (2) shared oversized neutral wires, (2) ground wires ((1) isolated ground, and (1) building ground). The 6-2-2 system allows more workstations to feed from one power supply point. Each wireway is designed to accept one duplex receptacle per side on each end, for a total of four. Table-to-table electrical is accomplished by jumpers. The system is energized by either a Base Infeed (liquid tight covered flexible conduit) or a Top Infeed (metal flexible conduit housed by an extruded aluminum pole). Hardwire electrical is also offered.

For ease of specification, some rectilinear and teaming worksurface models include preconfigured rigid wireway. Peninsula worksurfaces, returns, and all assemblies that feature a "center work rail" do not include any electrical components. Supporting privacy screens or frameless privacy screens require the use of specific electrical components for attachment below the center work rail.

Infeeds, receptacles, cable risers and jumpers are all specified separately.

Consult the Planning Guide and Pricelist for rules and specific models as they relate to Electrical Planning.

### Connection Zone® Workrail Planning

General Information

### **Frameless Privacy Screens**

Frameless Privacy Screens feature the option of either acrylic or glass inserts fitted into an aluminum work rail whose top rests flush with the top of the worksurface. Screens are offered in 13" and 19" heights and in widths of 6" increments from 36-96" (64" is also available).

Frameless Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components.

Note: Dividers cannot be attached to Frameless Privacy Screens

### **Supporting Privacy Screens**

Supporting privacy screens feature an aluminum work rail whose top rests flush with the top of the worksurface. Vertical aluminum posts and a single top rail enclose insert panels offered in steel dry erase markerboard, acrylic, or tackable fabric options. Screens are 19" high and are available in widths of 6" increments from 36-96" (64" is also available). Supporting Privacy Screens require the attachment of a Laminate Counter Shelf or Upmount Storage Cubby, specified separately, to complete the assembly.

Supporting Privacy Screens are offered on dual-sided benching assemblies only. Corresponding worksurfaces must be specified as non-powered, and must utilize "Rail Supported" electrical components. Dividers may be attached to Supporting Privacy Screens at intersection locations.

### **Shelves and Upmount Storage Cubbies**

Designed to complete a Supporting Privacy Screen assembly, Laminate Counter Shelves and Upmount Storage Cubbies expand storage options within Benching applications. Shelves are 15-3/4" deep, and overhang each side by approximately 7". Widths range from 36-96" in 6" increments. Upmount Storage Cubbies are split (open on the right hand side) to provide each of two facing users equal storage space. Open laminate with steel partition or steel with sliding/locking doors are available in 6" increments from 36-72"

## Connection Zone® Storage

General Information

### **GENERAL INFORMATION**

The Connection Zone Storage offering is a collection of elements created for space efficiency within open environments. The collection consists of shared Lockers and individual Credenzas and Pedestals.

### **CONSTRUCTION AND STANDARD FEATURES**

### Shared Lockers:

Standard size and large lockers are sized to accommodate binders, bags and other personal items. A coat hook is standard and an optional fixed blank shelf (which divides the compartment vertically in two) is available for the large lockers. Large lockers are double the height of standard lockers. Both the standard and large locker shells are available in 30 & 36" widths. The standard locker is available in 3 heights: 33-1/8", 48-7/16" & 63-3/4" and large locker is available in 2 heights: 33-1/8" & 63-3/4".

### **Interior Clearance:**

Single Module: 13-1/2 & 16-1/2W x 16-7/8D x 14-1/2H Double Module: 13-1/2 & 16-1/2W x 16-7/8D x 30-1/8H

### Shell:

Connection Locker shells are formed of 18 ga, uprights, top and bottom reinforcements welded together to create a rigid box frame. The outer skin is constructed of 19 and 20 ga CRS with a seamless back detail. Lockers feature leveling glides with a 1" adjustment range. Shell is common to the 700 Series lateral storage units.

### Partitions:

A 1-1/2" thick double wall hidden partition divides the locker shell in half running from top to bottom into which the cupboard doors lock.

### Shelves:

1" thick shelves with front and back flanges screw into the upright members of the case and center partition to create separation between modules.

### Doors:

Locker doors are single-wall construction with a structural hinge channel running the length of the door. Self-closing European style hinges with 110 degree opening provide 3 way adjustment of door to ensure consisting gapping and operation.

### Locker Locks

Locks are available anywhere a door is used, with four locking options for Ruckus Storage:

1. Standard key lock (comes with pull option only) - Locks are a high-security double-bit design. One KI break-away key and one standard key are included with each lock. Units are standard with random keys in a range of 200 different numbers (994 key numbers available for order). Note that units with multiple locks are keyed alike as standard. Specific key combinations are available at no additional charge. This information must be included with the order.

Locks can be master keyed. Please see the accessories sections of this price book for ordering keys. Available keys are:

- Lock Core/Keys Lock core and 2 keys are used in P-Series lock housings. Indicate in order notes if a specific core number is required.
- Master Key Single key which opens any P-Series lock.
- Extractor Key Single key which extracts any P-Series lock core.
- Blank Key Single uncut P-Series key to be cut as required by locksmith.
- Cut Key 2 keys for a specific P-Series lock core number as indicated in the order notes.

All locks have removable and interchangeable plugs. This feature provides for on-site custom keying. Units can be supplied with the lock plugs installed or shipped separately. To install or remove lock plugs, a unique key is required. This key is the extractor (core-removal) key and can be found in the storage accessories portions of this price book. Contact customer service to order lock accessories. To order plugs for field installation, specify "lock plugs not installed" on order. Order must specify total quantity of specific key numbered locks.

Example: 30 plugs 3 keyed alike 10 keyed alike 17 keyed alike

- Padlock Robust zinc housing allows the end user to apply their own combination lock. Lock is backed with a stainless steel escutcheon plate to protect the paint finish.
- 3. Combination lock A 4-dial combination lock that allows user to access locker without the need of a key. All locks are shipped with a factory set code 3333, combination is set by the end user or facility manager. In the case of lost or forgotten codes, a master key override will unlock the unit and allow the lock to be recoded. Combination lock features solid zinc construction. And a four digit combination allows up to 10,000 unique codes.
- 4. Digital lock Stand-alone battery operated lock allows user immediate and simple keypad access without the need of a key. All locks are shipped with a factory set code 2244, the new access code is set by the end user or facility manager. Users have the flexibility to set and change a personal entry code, while a preset master code ensures that supervisor access is always available, or in an emergency, the key code can be overridden.

### Features:

- •Up to 80,000 operating cycle's battery life
- ·Low battery warning
- •Battery failure key override
- •8-digit master code and 6-digit sub-master codes
- •4-digit user code (10,000 unique codes)
- •6-digit technician code
- •Code changeable
- •Not suitable for chlorinated environments
- •Can be programed for single use set at time of use or fixed combination mode

### Credenzas:

Connection Zone credenza shells are constructed of 18 and 20 ga steel components with 18 ga structural top and bottom reinforcements and vertical uprights. Credenzas are available in 60" & 72" widths and feature variations of open bookcase and drawer sections. Credenzas are available in heights of 17-11/16", 20-3/4" and 23-13/16."

### Interior Configuration & Clearance:

17-11/16 high unit:

Bookcase section - 12-3/8" H x 28-1/2" & 34-1/5" W x 18"D

Drawer Section – A) 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)

B) Qty, 2 6" box drawers that will accept plate dividers (sold separately)

### 20-3/4" high unit:

Bookcase section – 15-7/16" H x 28-1/2" & 34-1/5" W x 18"D

Drawer Section -3" Pencil Drawer & 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)

### 23-13/16" high unit:

Bookcase section – 18-1/2" H x 28-1/2" & 34-1/5" W x 18"D with 1 adjustable blank shelf

Drawer Section – 6" Drawer that will accept plate dividers (sold separately), 12" Drawer with 27 & 33 lineal inches of filing side to side. Unit standard with side to side folder bars, optional plate dividers (sold separately)

### Drawers:

Steel and laminate drawer fronts that accept exterior pulls are available as standard. Fronts are screw-mounted to roll-out shelves to build drawers. All drawers feature smooth riding, full-extension, ball bearing slides. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls. Key lock is standard on 12" drawers.

### Testino

Components have been tested to accept loads of 125 pounds, exceeding ANSI/BIFM X5.9 2004 standards for filing when recommended counterbalance weight is installed.

### Partition:

A 1-1/2" thick double wall partition runs down the center of the unit dividing the bookcase section from the file section.

### Leas

1-1/2" x 34" Steel legs with threaded insert and 16 ga top plate are bolted to the underside of the credenza raising it 3-1/16 off the floor. Adjustable leveling glides provide 1" of adjustment.

### Pedestals:

Mobile Box/ File Pedestals 15 W  $\times$  21-3/4" are available in 3 depths, 17-5/8", 21-5/8" and 27-5/8"

### Basic Shell

Twenty-gauge steel body with 20-gauge steel top and box frame front and back uprights. Uprights are notched in 3" intervals for drawer suspension mounting.

### Drawers

Single wall metal or laminate fronts screw mount to prepainted drawer bodies and overlap the face of the unit. Box (6") Drawers operate on 2 piece ¾ extensions ball bearing suspensions, File Drawers operate on 3 piece full extension ball bearing suspensions. Pull options include ADA-compliant nickel plated loop pulls or nickel-plated rectangular pulls.

General Information

Acrylic Gradient Pattern Printed Surface

Acrylic Grid Pattern Printed Surface

Acrylic Solid White Unprinted Surface

Acrylic Translucent Crystal Unprinted Surface

Connection Zone® Screens, as part of the Connection Zone® Collection, offer freestanding mobile collaboration and space division. Mobile screens feature steel frames and acrylic inserts, either printed or unprinted, with dry-erase coating. All Connection Zone® Screen models meet or exceed relevant ANSI/BIFMA X5.6-2010/BIFMA 5.9-2012 standards, available upon request.

## CONSTRUCTION AND STANDARD FEATURES

#### Frame Construction

Mobile frames are constructed of steel tube supports. Tubes are shaped and joined to create a screen with interior storage compartments. Frame is fully coated with dry-erase powdercoat paint, allowing marker writability on all painted surfaces. Frames support the attachment of acrylic sheets for the creation of a two-sided complete screen, and frame design allows for physical connection of one screen to another. Frames

feature 2 steel formed hooks for attachment of flip chart pads.

Screens available in heights of 72" and 80", and in widths of 36" and 42". Screen floor space depth is 22-1/2".

#### **Acrylic Inserts**

One-quarter inch thick acrylic sheets are captured on either side of steel frame. Acrylic features dry-erase coating on userfacing side of each sheet for full surface writability.

Inserts may be specified in either unprinted or printed styles. See images above and pricelist for available options. Other print patterns and customization are available through KI Custom Options, subject to additional lead time and set up charges.

#### Steel Inserts

Steel inserts feature a dry erase-writable surface attached to a hardboard core. Steel inserts are magnetic and accept optional

tackable fabric bulletin boards and rails.

#### **Fabric Inserts**

Fabric inserts feature fiberglass cores. Inserts are tackable and are offered in a variety of colors. Fabric inserts are neither writeable nor magnetic.

#### Casters

Casters feature 4" black swivel twin wheels, and are plate-mounted.

#### Ledge

An optional steel accessory shelf ledge is available allowing for placement of foam board or other presentation materials at the bottom of the unit.

#### **Bulletin Boards and Rails**

Optional tackable bulletin boards are intended for placement on the upper portion of steel insert tiles. Boards are magnetically attached and are fully repositionable.

Rails are intended for horizontal placement anywhere on a steel insert.

## Privacy Booth General Information

Connection Zone Privacy Booths create the perfect getaway in a bustling environment. Their interesting design encourages use and allows visibility while clearly communicating that privacy is desired.

#### **CONSTRUCTION:**

#### Frame

25 mm slim tubular, contoured board base features internal and external sound-reducing treatment for visual and acoustic privacy. Exterior of unit is fully upholstered in a variety of finish options, with twin stitch detail and piping.

#### Base

Swivel base is constructed of steel and features soft running casters.

#### Suspension—Seat and Back

The seat and back are sprung with stretch webbing stapled into position onto a circular CNC timber base.

#### Seat and Back

Seat cushion is formed from dual-density CMHR foam.

#### Upholstery

Outer booth is upholstered in Blazer or Pallas Sheepish as

Inner booth is upholstered in Blazer Quilt Hourglass as standard.

Seat back and cushion may be upholstered in a variety of approved KI and Pallas fabrics. Refer to approved listing for details.

Fire rated and moisture barrier options may be available at an upcharge. Contact plant for details.

#### INFORMATION

#### C.O.M. Requirements

C.O.M. yardage requirements listed above are based on plain goods 54 wide. If less than 54" wide or fabrics requiring matching (stripes, plaids, prints, large patterns), additional yardage will be needed. Consult C.O.M. matrix on the Ordering C.O.M. and C.O.L. page for additional yardage needed. For C.O.M. fabric sent to KI-High Point on multiple rolls, add an additional yard of fabric per roll to the yardage requirements.

#### C.O.L. Requirements

Figure 18 sq. ft. of leather (C.O.L.) for each yard shown (i.e., 4.75 x 18 = 85.5 sq. ft.).

#### **Contrasting Upholstery**

When contrasting fabric is chosen, price at highest in-grade.

#### Minimum Fabric/Leather Quantity

Minimum order for fabric is 1 yard. Minimum order for leather is 1 hide (approxi-
