

# INSPIRED AESTHETICS

## Fixed Seating *enhancements*

*Fresh. Durable. Inspiring.*

- Classic KI fixed seating gets a fresh, modern aesthetic with these new offerings. Design-friendly options are both aesthetic and practical: laminated wood seats, worksurfaces with multiplex edges, and frosted acrylic modesty panels.
- These heightened aesthetics meet or exceed ANSI BIFMA testing standards, which ensures unmatched product durability and peace of mind.
- Visually appealing lecture hall seating can inspire creative thinking, elevate interest and promote engaged learning.

Contemporary laminated wood seats (Apply™ seating) are contoured to provide comfort and support. “Ears” at top of back are a convenient place to hang backpacks. Available with or without upholstered seat pad.

Frosted, acrylic modesty panels are 1/4" thick and available in a variety of design-friendly colors.

The new 74M Multiplex edge (EMB) offers the look of exposed plywood with the performance of the 74P molded edge.
