

# Uniframe Round Table with Seating Operation Instruction

Tables with Split Benches  
or Stool Seats - UFRD5 Series

## To Unfold:

1. Find an appropriately sized area to open the table. Clear the area of children, people or obstacles which could accidentally be injured or damaged while opening the table.
2. Locate storage lock release handle on either side of the table. Lift (turn) the handle end to release storage lock. Push table halves apart by applying an outward force to the center of each top.
3. While keeping feet clear, lift up on the side of the tabletop and press down at the center until the gravity lock engages (as shown).

**WARNING:** Failure to ensure gravity lock engagement may cause table to become unstable with possibility of serious injury.

## To Fold:

1. Push down gently on top at table center and lift (turn) gravity lock from either side of table. Lift table center slightly to ensure gravity lock disengagement. Place each hand approximately 12" from table center and apply an upward force.
2. Place hands at center of each top and apply an inward force until storage lock engages.

**WARNING:** Failure to ensure storage lock engagement may cause table to become unstable with possibility of serious injury.
