Keyn Chair Group™

Responsive movement and immediate
comfort for collaborative spaces

Keyn Chair Group by Herman Miller™
Designed by forpeople

The Keyn Chair Group offers a range of side and meeting chairs that can easily reflect the personality of any organization through a meaningful range of options and upholstery selections. By allowing the one-piece seat-and-back shell to slide smoothly and provide a controlled, fluid recline, Keyn helps people stay comfortable and remain focused by naturally and frequently changing postures.

Keyn is also versatile in appearance and function. A range of looks can be achieved by combining bases, shell and frame finishes, arm selections, and a broad choice of upholstery materials. Four-leg chairs can easily be stacked and stowed when not in use. With the four-star base and glides, a return-to-center swivel ensures that meeting spaces always look great, even when they're not in use. The five-star base with casters creates a free-moving seating option for working at a desk, collaborating with colleagues, or sitting comfortably in a meeting.

Performance

For sitting to be as healthful as possible, people should change positions frequently. Keyn makes this possible by responding to the body's movements. Its patented mechanism allows the one-piece seat-and-back shell to slide smoothly and provide a controlled, fluid, 10-degree recline so that people can move naturally and feel comfortable. This sense of ease allows the mind to focus, which can help increase productivity while people are collaborating or during meetings.

As you shift and adjust your posture, Keyn responds to you. The chair smoothly reclines up to 10 degrees.

A perforated pattern adds aeration and textural depth, further distinguishing Keyn and contributing to its lightweight look and feel. The fully upholstered option allows a color burst to show through the perforation, enhancing your palette with an additional accent color.

Keyn can be bold and playful or sophisticated and subdued, allowing it to find a home anywhere from the meeting room to the cafeteria to a private office.

Design

A key consideration of forpeople's design approach was to ensure that each variation of the chair had the same universal appeal. A refined design was achieved based on four key parts: the base, cradle, seat shell, and a selection of upholstery options. Keyn's global availability makes it an appealing choice for customers with locations around the world seeking consistency from site to site.

About forpeople

Most people have probably flown, driven, watched, eaten, spoken on, stayed in, or sat on a design from forpeople, but you may never have heard of them. That's because with forpeople, the work always comes before publicity. The firm has been collaborating with Herman Miller since 2009. It's been a natural partnership, since both companies see things much the same way: the continuous search for new perspectives and insights, brought to life through problem-solving design, cutting-edge engineering, and responsible manufacturing. All with the aim of improving how people work and live every day.

Joohee Lee and Richard Stevens

Materials

With Keyn, a meaningful range of looks can be achieved by combining bases, shell and frame finishes, arm selections, and a broad choice of upholstery materials. Visit hermanmiller.com/materials to see our complete textile and materials offering.
