Overbed Table

Mirage

Overbed Table

The Mirage Overbed Table was designed to provide dedicated space for both patients and caregivers. The main tray adjusts vertically within a range of over 17 inches to fit a wide variety of patients and applications. Optional upper and lower trays on the urethane edge top add patient and caregiver functionality, and rounded inside edges make the trays easy to clean. The durawrap top can include a lower tray and has a raised edge for containing liquid spills.

Designed by Nemschoff

Human-Centered Solutions

Patient Convenience and Organization

A large main tray provides ample space for eating or activities, and a separate compartment and optional upper tray expand the patient's options for organization.

Caregiver Support

Table height is easily adjusted with a one-handed mechanism. The adjustable bottom tray is positioned toward the caregiver, keeping supplies within reach.

Flexible Accommodation

With over 17" (43cm) of vertical range adjustment, Mirage is comfortable for patient use in a chair or bed. The X-base conveniently accommodates chairs, while the U-base was designed for use with beds.

Choices

Mirage

Overbed Table

Details

Generous rounded urethane tray edges and durawrap table edges contain spills and make cleanup easy.

Smooth, one-handed activation to raise and lower the top from 29.75" (76cm) to 47.5" (121cm).

Framed vanity mirror with storage can be added to all versions of Mirage.
