

Nala[®]

Patient Chair

Nala

Patient Chair

Built with the same ergonomic innovations in Herman Miller's award-winning chairs, Nala combines ergonomics and technology with the comfort, durability, and ease of cleaning you need in a patient chair. Its tilt, support, and contours all follow the movement of the human body, creating a patient chair that's truly designed around the patient.

Designed by Continuum

Details

Recline and arm pivot can be controlled from either side with either hand.

Integral back handle assists caregivers when moving chair.

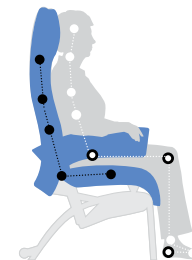

Optional tilt and roll casters on rear legs engage when chair is tipped back providing greater support when repositioning chair.

Optional front and rear casters allow for better maneuverability.

Enhanced Features

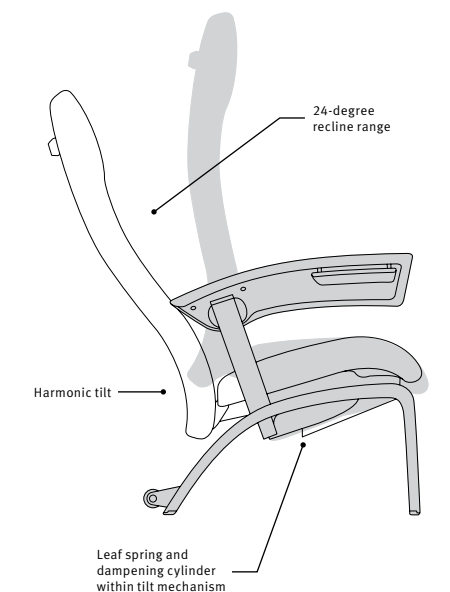

Ergonomic Design

Nala's optional Harmonic tilt mimics the natural movement of the patient's body. The chair's back and seat move synchronously, opening up as the patient reclines and tilting around the body's natural pivot points. Patients can rest anywhere within a 24-degree recline range. Dampening cylinder controls movement for large- or small-statured patients.

Support + Comfort

Nala's seat-and-back suspension is a series of firm, flexible straps encased in a layer of high-density foam. The combination offers a perfect balance: responsive and even support over the entire chair surface and a soft outer layer for a comfortable sit and feel.

Upholstery Configurations

Nala offers designers choices for combining textiles and colors, including the five upholstery configuration options shown here.

Configuration 1

Configuration 2

Configuration 3

Configuration 4

Configuration 5

Features

- Harmonic tilt
- Seat and back suspension
- Dual-arm recline activation
- Titanium powder-coated aluminum frame
- Dark grey urethane arm pads
- 24-degree recline range
- Seat and back suspension integrated on back of the seat
- GREENGUARD Gold Certified
- Limited Lifetime Warranty; 12 years on mechanisms and mechanical components

Options

- Moisture barrier
- Pivoting arms
- Tilt and roll casters
- 3" (8cm) twin-wheel casters with roll control; front swivel with brakes, rear swivel
- Integral back handle
- Headrest pillow
- Coordinating footstool
- CTB 133
- Multiple fabric application
