Ollin™ Monitor Arms

Easy Support for Many Devices

Ollin Monitor Arms

Designed by Colebrook Bosson Saunders

As technology advances, devices become lighter and more compact. With the Ollin Monitor Arm, you can support a range of monitors and laptops of various weights. The arm has a wide range of motion,

allowing you to position screens wherever makes you most comfortable, encouraging a healthier posture whether you're sitting or standing.

Easy Support for the Lightest Devices

Ollin can support a range of monitors and laptops weighing up to 20 pounds. You won't need any tools to adjust the arm because it has an integrated thumbwheel adjuster, making it a hassle-free solution for screens of various weights.

Ollin is powered by a technical cord that offers smooth, dynamic movement and makes it possible to support the lightest devices. The weight gauge lets you set the optimal tension to provide stable support.

Adjustable for Many Needs

With Ollin's wide range of motion—horizontally 26.5 inches and vertically 13.5 inches—you can position your screen at a comfortable spot based on where you're sitting or standing, bringing the monitor to you and not the other way around. Ollin's tilt range, up to 80 degrees rearward and 10 degrees forward, prevents your neck from craning and your shoulders from hunching—creating a healthier posture that can lead to increased productivity. The range of motion and tilt range are also ideal for touch screens and helpful for those with progressive lenses.

Whether the task at hand calls for a landscape or portrait view, you can rotate the position of your device accordingly. The monitor arm's smooth articulation and responsive movement provides fingertip screen control for an effortless experience.

Power Incorporated

Ollin's threepoint cable management system helps avoid clutter and keep cables organized. With the addition of the Flo® Power Hub, you can use three convenient USB ports, including one designed specifically for fast charging, for easy, convenient power within arm's reach.

One Arm, Multiple Configurations

Ollin is easy to customize and adapt as work styles shift. You can attach a dual-screen mount to the main arm to enable moving two monitors horizontally and vertically, or tilting in tandem. The dual setup supports monitors up to 27 inches and weighing as much as eight pounds each. Accommodating two monitors with one arm maximizes the work surface and simplifies the equipment needed to create a comfortable visual experience.
