Introduction

A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table.
The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

General Information

This book is effective April 1, 2019, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

This keyboard support has a track and a separate platform. The support adjusts 8 1/4" above the track and 5 7/8" below the track (total range of 14 1/8") to provide sit-to-stand capability. A torsion spring helps offset keyboard weight during height adjustment. A tilt knob provides independent tilt adjustment from –15° to 10°. A glide track system allows easy movement, and the support swivels 360 degrees for storage beneath the work surface. Attachment hardware is included. Shipped knocked down.

The concave platform attaches to a boomerang™, rectangular, or corner work surface. It has a wider surface that holds a keyboard and mouse, a laptop computer, or other input device. The routed edge on the platform makes it easy to grasp and move. Each platform has 4 clips that attach along the routed edge. The clips hold cords in place and keep a keyboard from sliding off the platform when tilted backward. The concave platform is available in 2 shapes: the concave platform with notched corners (Y7724.A) fits into the contour of a 24"-deep × 36"-wide corner work surface. The concave platform (Y7724.B) fits into the contour of a concave work surface. Each concave platform has a laminate or formcoat® finish.

The platform with palm rest and mouse tray attaches to a boomerang, rectangular, or corner work surface. It holds a detached keyboard and mouse. The platform includes 2 wire management clips, 4 anti-skid pads for the keyboard, 1 adhesive mouse keeper to keep the mouse from sliding off the tray when tilted backward, and 1 mouse pad. The mouse tray swivels 360° and tilts forward and backward; it mounts on either side of the platform for right- or left-handed users. The black palm rest is washable foam.

Trays are available in plastic, high-density polyethylene (HDPE), and aluminum with an adjustable or swivel mouse tray.

Notes

Bottom of work surface cannot have any bracing or obstruction.

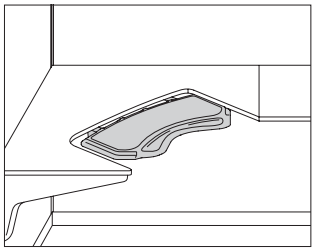
Flex-Edge™ Input Platform Y7735.



Product Information

Description

This adjustable platform attaches to a corner work surface with an input platform cutout. The platform has a laminate top. A flexible waterfall front edge supports the user's arms during input and writing tasks, and flexible edges at each side provide protection from pinching between the platform and the adjacent work surface when adjusting the height. A curbed edge keeps items from rolling off the back and side edges. The height is adjusted with a paddle under the right side of the platform. The pneumatic assist mechanism allows the user to freely adjust the platform vertically. The platform also tilts 15° forward and 15° backward, using a knob on the right side. Attachment hardware is included.

Notes

Order corner work surface with input platform cutout (A2336., EWS24., or FTS24.) separately.

Storage products, keyboard tray, and accessories cannot attach to platform.

The 15″ of height adjustment range (15) allows platform adjustment from 8″ below to 7″ above the rear work surface.

The 18″ of height adjustment range (18) allows platform adjustment from 6″ below to 12½″ above the rear work surface.

Customer's Own Material Order Information — Workspaces

Customer's Own Material

Program Overview

The Customer's Own Material (COM) program gives you the option of using textiles other than those listed. Herman Miller will test textiles for application to Herman Miller products and will process orders for those with approved COM textiles only. COM textiles are on assigned lead times.

Omni lists an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for COM is listed below. Questions about the COM program and requests for assistance may be directed to your COM representative at:
(616) 654 3400
(866) 854 3048 EXT 6543400

Customer's Own Material Warranty

Herman Miller does not warrant COM textiles. COM textiles are tested for application only; they are not tested for performance. The Herman Miller warranty does apply to the underlying products.

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Customer's Own Material Pricing

COM is a Category 1 fabric. There are no application charges for COM fabrics.

Ordering and payment for COM textile yardage are the responsibility of the customer and the textile supplier.

If desired, Herman Miller will purchase COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles to simplify ordering and shipment. For this service, refer to the Supplier Connection program.

Application Note

Herman Miller does not guarantee that Customer's Own Material (COM) fabric patterns will align across panels/tiles or from one screen to the next. We also do not guarantee that COM fabric designs will be positioned consistently in the same location across several panels, tiles, or screens.

COM is not available on panels.

Textile Approval

1. Select a COM textile and a Herman Miller product.
2. If your textile is not listed in Omni, obtain a test number from a COM representative at (616) 654 3400. You can also submit your request within Omni. Please have the following information ready before calling: textile name, number, pattern, and the product you will apply it to.
3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with COM

1. Refer to the specific products to determine the yardage required for COM textiles.
2. If your textile is not listed in Omni, call a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400. The representative will assign an identification number for your textile (ID#) and will verify yardage requirements for your order.
   Note: Yardage requirements are based on nondirectional, 54"-wide textiles. 66"-wide textiles are needed for application on 60"-wide products. Additional yardage may be needed due to the unique characteristics of a textile.
3. Enter your order on Order Manager in Omni.
4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the Herman Miller products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400.

   Products will be scheduled for production when COM textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

   Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Supplier Connection

Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:
(616) 654 3400

Suppliers of COM textiles are responsible for color consistency within commercial tolerances, UV stability, and resistance to soiling and perspiration.

Supplier Connection Pricing

Textiles purchased by Herman Miller through the Supplier Connection program are COM. COM is a Category 1 fabric. There are no application charges for COM fabrics.
