A Note on the Organization of This Book

There are a few signals that will help you understand the organization of this book. Once you know them, you should be able to find your way around easily.

Like a newspaper, this book is formatted with columns of text and illustrations that run vertically.

Information wraps from one column to the next and continues for as many pages as it needs to.

Black bars are clues.

A black bar at the top of a page signals the start of information about a product.

This information is divided into two sections, each signaled by a black bar. Product Information includes a description, additional notes, and dimensional drawings. Specification Information, which always begins at the top of a column, includes a series of steps. Each step represents a decision you need to make in order to complete your product number. Steps must be followed sequentially. The number of pages needed to complete information on a product varies; some will be complete in one page; others may fill three or four pages. Just continue going through the steps until you run into the next product, signaled by the black bar at the top of the page.

Black tabs running along the outside edge of the page help you locate what section you are in or what section you want to go to. You can thumb forwards or backwards to find a section; tabs and text appear on both sides of the page.

The additional pages in the back of the book include the appendices and indices. They are signaled by a long black bar running along the outside edge of the page.

The index is presented two ways.

The first index is in alphabetical order by product name. It can be helpful if you are new to the products and numbering scheme or if you are looking for a type of product, such as work chair or round table. The second index is by product number. It lists, in alphanumeric order, the base product number, typically a five-digit number.

This book is effective April 1, 2019, subject to change without notice. Products may be purchased from authorized Herman Miller dealers who will quote prices upon request. For more information about our products and services or to see a list of dealers, visit www.HermanMiller.com.

All prices are list prices in US Dollars. Additional services, such as planning services, design, storage, and installation, are not included and must be added to these prices when the additional services are requested.

Illustrations, specifications, and prices are based on the latest information at the time of publication. The right is reserved to make changes at any time without notice in prices, fabrics, finishes, materials, specifications, and models, and also to discontinue models and finishes.

Dimensions shown in the drawings are engineering drawing dimensions rounded up to the nearest 1/8". Product is shipped set up or knocked down. Products that include "Shipped knocked down" in the description require some assembly. If this statement does not appear in the description, the product is shipped assembled.

Service problems are normally handled by a Herman Miller authorized dealer. Where this cannot be accomplished on a local level, service problems should be referred to the Customer Care Representative for your region, Herman Miller, Inc., Zeeland, Michigan 49464.

20-Day or Less/Assigned Lead-Time Shipments

Desk

BVD1.

Product Information

Description

Desks have 4 legs and are intended to connect with other desks and connecting bins. Desks have a laminate, veneer, or Formcoat® squared-edge work surface with a painted steel understructure bin on 1 side and a steel shelf with a bag hook on the other side. Desks will support a screen on the shelf side, and on the bin side when the bin does not have doors, and will accommodate desktop dividers. Understructure bins come in left or right orientation, with or without doors. Bin divider included. Legs have glides that provide up to 2" of adjustment. Power bridge desk allows power to be run from desk-bin side to L-shelf side of the desk to accommodate powering other desks or café surfaces from a single power entry point. The desk bin and L-shelf have internal structures and components to support power across the desk.

Notes

To connect desk to a connecting bin (BVD2.) or another desk (BVD1.), order desk and bin ganging plate (BVD5.C) separately.

All connecting bins (BVD2.) require the use of both bin-to-bin and desktop-to-desktop ganging plates. Order desk and bin ganging plate (BVD5.C) separately.

The exposed end of the understructure bin requires a desk and bin finishing kit (BVD4.), ordered separately.

Desk accepts modular power (BVEo1., BVEo2.) through the bottom of the understructure bin.

To bring power to the surface of a desk, order Logic Mini, Grommet Mount (Y1414.) separately.

Bin divider is field installed and can be specified in a complementary color.

Grommet color is either graphite or white, matched to the work surface color.

Bag hook color is matched to shelf color.

When specifying trivalent chrome (47) leg finish, glide color is predetermined to coordinate with specified desk finish:

- Graphite (G1) desk will have black (BK) glides
- Metallic silver (MS) desk will have fog (63) glides
- White (G1) desk will have folkstone grey (8Q) glides

Power bridge desk includes cable management channel and L-shelf cover for beam connection.

Power bridge desk can only be ordered without doors, to accommodate the power bridge components.

See Planning Guide for more information about settings.

Textile Approval

- 1. Select a COM/COL textile and a Herman Miller product.
- 2. If your textile is not listed in Omni, obtain a test number from a COM representative at (616) 654 3400. You can also submit your request within Omni. Please have the following information ready before calling: textile name, number, pattern, roll width, and the product you will apply it to.

Additional yardage may be needed due to the unique characteristics of a textile. All package labels must include the words "COM test" or "COL test" and the assigned COM/COL test number.

- 3. Herman Miller will notify you of approval or disapproval within 4 days from receipt of the test yardage.

Ordering Products with COM/COL

- 1. Refer to the specific products to determine the yardage required for COM/COL textiles.
- 2. If your textile is not listed in Omni, call a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400. The representative will assign an identification number for your textile (ID#) and will verify yardage requirements for your order. Additional yardage may be needed due to the unique characteristics of a textile.
- 3. Enter your order on Order Manager in Omni.
- 4. Upon receipt of your purchase order, Herman Miller will send you a PO acknowledgment.
- 5. Arrangements must be made for the textiles to be shipped from the supplier to Herman Miller for application to the seating products. Textiles must be tagged with the assigned identification number and the roll yardage quantity. See Omni for shipping procedures and current shipping addresses or contact a COM representative at (616) 654 3400 or (866) 854 3048 EXT 6543400.

Products will be scheduled for production when COM/COL textiles are received at Herman Miller. Standard lead times in effect at that time will apply.

Note: If textiles are to be purchased directly by Herman Miller through the Supplier Connection program, Herman Miller will handle the ordering and shipping process and will schedule your order for production upon receipt of your purchase order (dependent on textile availability). Refer to the Supplier Connection program for more information.

Supplier Connection

Program Overview

The Supplier Connection program is a service offered by Herman Miller to purchase approved COM textiles directly from True Textiles, C.F. Stinson, Luna Textiles, Maharam, and Momentum Textiles. When you select a textile through this program, Herman Miller will facilitate the ordering, scheduling, and shipment of the textile directly with the supplier.

Suppliers included in the Supplier Connection program keep an active inventory of textiles that are pre-approved for application to Herman Miller products. Pre-approval applies only to the suitability of a textile for manufacturing and application to a Herman Miller product. Omni provides an overview of fabrics that have been tested and indicates whether or not they were approved for application to Herman Miller products.

Specific information on the terms and conditions, testing, approval, and ordering process for the Supplier Connection program is listed below. Questions and requests for assistance may be directed to your COM representative at:

(616) 654 3400
