

## Leap®

Its back moves as your back moves. Its arms move as your arms move. Its seat moves as your seat moves. It's the first chair that actually changes shape to mimic and support of the movement of your spine. Thanks to its advanced technology and extraordinary comfort, the Leap Chair is a proven technology...a healthier way to sit.

### MOVEMENT

Moving throughout the day helps keep us refreshed and energized. Leap's LiveBack® changes shape to fully support your upper and lower back and the mechanism enables you to fine tune the precise amount of recline force you desire encouraging movement and postural change.

### ORIENTATION

Our vision and reach impact our posture so Leap's Natural Glide Mechanism and 4D arms were intentionally designed to help keep you connected to your work during upright and reclined postures reducing strain on your eyes, arms and neck.

### FIT

Your body is unique. You need a desk chair that easily adjusts to fit you, your preferences, and how you work. Leap's adjustments were designed to be intuitive and easy for users to reach, making it easy to customize the chair's comfort to your needs.

**LOWER BACK FIRMNESS**

Turn the knob forward to increase firmness. Turn the knob backward to decrease firmness.

**UPPER BACK FORCE**

Turn the knob forward to increase tension. Turn the knob backward to decrease tension.

**BACK STOP**

Set recline angle by rotating the paddle to any of the five positions. When the paddle is horizontal, the back will allow you to fully recline.

**SEAT HEIGHT**

To raise the chair, lift your body weight and pull lever up.  
To lower the chair, stay seated and pull lever up.

**HEIGHT / WIDTH / PIVOT / DEPTH  
ADJUSTABLE ARMS\***

Lift button under arm caps to adjust height.  
To adjust arm cap position, grasp arm caps and slide or pivot in any direction. Your elbows should stay close to your sides and your wrists straight.

**ADJUSTABLE LUMBAR**

For additional back support, grab both handles and slide up or down. Position the lumbar to fit comfortably into the curve of your lower back.

**SEAT DEPTH**

Lift lever and hold, slide seat forward or back and release lever to lock. Allow adequate space between the back of your knees and the seat edge.
