The Human Factor

At the center of every company are its people. Employee productivity directly affects overall business performance, and healthy, happy employees are simply more productive. Therefore, employee wellbeing is vital for maximizing individual and organizational potential. Workspace and worktools have a profound impact on overall health. Steelcase keyboards and mechanisms prioritize comfort and customization, offering well-designed office solutions to support a healthy, productive workforce.

89%

of workers worldwide experience
discomfort on a daily basis.
Microsoft Workplace Study

The Uncomfortable Reality

Unfortunately, physical pain is common at the office. A surprising majority of computer users experience daily discomfort in the workplace due to poor workspace design and lack of supportive office tools. Improper wrist, arm, and shoulder postures lead to physical distress that can have a negative impact on employee wellbeing and performance.

EFFECTS ON THE BODY

Workers agree that physical discomfort is often experienced in areas of the body most affected by poorly set up desk spaces, such as the neck, shoulders and wrists.

Keyboard Solutions

Keyboard platforms and mechanisms are designed with the body in mind, allowing users to choose their ideal size, shape and position, accommodating an array of workspaces and styles.

Adjustability is key when it comes to healthy posture. The desired height and tilt of the keyboard is easily customized using one of three mechanisms, each of which may be paired with a Steelcase platform, providing a wide variety of possible keyboard support combinations.

SUSTAINABILITY

At its heart, sustainability at Steelcase is about people. It’s about creating and supporting the economic, environmental and social conditions that allow people and communities to reach their full potential.

Research and insights direct our path. It’s not only about creating goods, it’s about creating good. It’s not only about creating value, it’s about living our values. It’s not just about reducing our footprint, it’s about expanding our reach. It’s about creating lasting and meaningful change to enable the long-term wellbeing of current and future generations.

Innovative products and solutions result. In the development of our products, we work to consider each stage of the life cycle: from materials extraction, production, transport, use and reuse, until the end of its life. We demonstrate performance through third-party verified certifications and voluntary product declarations.

Steelcase’s sustainability promises, actions, and results are communicated in an annual Corporate Sustainability Report.
