Yes = It will work

No = It will not work

¹ Will not mount with c:scape screen

² Clearance for tool/set screw fastener is limited

³ Standard mechanisms will not work on c:scape or FrameOne

⁴ Worksurface depth must be = or greater than track length. Desks 60" & wider will have a HAT channel placed under the worksurface (dealer installed) which may interfere with the keyboard track.

Actual application and product usage may vary. See your Target Solutions Representative for specifics. List will evolve, check back for additions.
