2005 NeoCon Silver Award
2009 NeoCon Silver Award

Refined. Scalable. Integrated.

Thoughtfully designed and thoroughly adaptable, the Compose system brings your vision to life. In striving to create the most streamlined system possible, Haworth delivers the consummate combination of aesthetic refinement and unsurpassed performance.

Compose encourages your creative freedom with solutions that can stand alone or integrate seamlessly with our Enclose® moveable walls. Strong and stable, yet distinctively flexible in fabrics, finishes and applications, Compose performs like no other system available today.

HAWORTH®

Compose

Compose benching with X Series® Active Storage.

Compose is designed with tremendous stability and broad specification options to meet a wide variety of interior needs. From distinctive worksurface shapes that promote collaboration to unique worksurface support options, you'll appreciate everything Compose can do. Compose benching meets the needs of mobile teams and collaborative work styles, while recognizing the trend of smaller footprints.

Enclose walls integrated with the Compose system.

The Compose open plan system brings design freedom and performance to the forefront. Whether integrated with Enclose walls or specified alone, the Compose system offers extensive choice for your interior needs.

Independent panels can be monolithic, segmented or stackable on either with three trim options—full wood, full aluminium, and thin steel. Overheads, worksurfaces and shelving extend readily to Enclose walls. And Haworth+ materials from Carnegie, Luna and Maharam enhance your flexibility with interchangeable tiles.

Compose®

Product Sheet Addendum

New Compose Wood Storage Enhancements.

Building upon Compose Systems wood enhancements introduced in 2009, Compose Wood Storage Enhancements allow Haworth products to address a new level in the design driven market. Now, we can provide our clients with a wood storage system superior to that of any competitor in the systems market today.

Designed by Haworth Design Studio.

HAWORTH®

New Compose Wood Storage Enhancements

Sustainable

- SCS Indoor Advantage™ Certified
- Forest Stewardship Certified® (FSC) Veneer Available

Refined

Compose Wood Storage provides warmth for more natural environments and communicates brand without sacrificing design. By providing interchangeable, defining elements, it follows the architectural design language of Compose Systems and Enclose® Moveable Walls.

Accessible

From open office environments to private office applications, Compose Wood Storage offers limitless options for the various works styles and organizational cultures. With sophisticated design at a scalable price point, Compose Wood Storage delivers high-end aesthetics within a broad range of budgets.

Integrated

Compose Wood Storage integrates seamlessly with Compose Systems and Enclose Moveable Walls. Its range of storage elements, worksurfaces, and supports assimilate in function, dimension, and aesthetic to create fully integrated and visually aligned workspaces.

Statement of Line
