

Planes[®]

Height-Adjustable Benching

Planes height-adjustable benching provides ergonomic solutions that give people the choice to sit or stand and change postures throughout the day. Either manual or electronic mechanisms are available to position the worksurface at the right height quickly and easily.

Sit. Stand. Move.

Planes height-adjustable benching offers several manual and electric adjustment options to support ergonomic and well-being needs.

Features

No matter how you specify your Planes benching, a variety of features help people perform their best.

Configurations – Accommodate a variety of planning scenarios. Choose from single-sided and dual rectangles or 3-pack 120° configurations.

Manual adjustment option – Crank provides 27"–46" of height range at 1" per six turns.

Electric adjustment option – Offers three ranges of electric height adjustment for a variety of needs: 22"–48" (exceeds ANSI/HFES 100-2007 standard) for sit to stand; 24"–50"; and 27"–46". The mechanism has two motors.

4-memory programmable adjustment option – Allows for easy and consistent worksurface positioning.

Power Distribution – Utilizes the same 3, 2+2, and 3+1 power system as other Haworth product to address user needs and for consistency across the floorplate.

Screens – Attach to the benching structure or top for visual privacy and color accent. Available in fabric, laminate, veneer, markerboard, and glass.

Wire management – Organizes and conceals cables and cords in a variety of ways: cable chain between the worksurface and benching structure; or various base feed options for end or middle of the run as well as above or below worksurface.

Collision detection kit – Optional sensor kit works with the included protection system to provide enhanced detection and reaction in the event of a collision.

Colors, Materials, Finishes

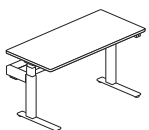

Planes worksurfaces are available in standard Haworth finishes, including laminates and veneers. The base is available in all standard Integrated Palette™ paint colors.

Certifications

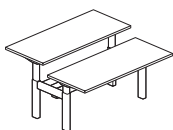

- BIFMA level® 3
- GREENGUARD®
- FSC®
- Contributes to LEED®
- ETL Listed to UL 962 and 1286
