

Step 1
Measure grid opening.

Step 2a
Transfer dimensions to panel.

Step 2b

Step 3
Score panel face between these points with a sharp utility knife and straight edge.

Step 4a
Make a second score parallel to the first with 1" to 3" between. Material between the score lines will be used to form a new side edge. The rest will be discarded.

Step 4b

Step 5
Snip the side edge of the panel at the ends of each score line.

Step 6a
Bend and break off the section to be discarded. Use a straightedge to avoid deforming the panel face.

6b

Step 7
 Use pliers to flatten the side edges of the remaining scored section.

Step 8
 Use a hammer to finish flattening these side edges. Be careful not to mar the panel face.

Step 9a
 Use a straightedge to bend up this flattened section at the score line. You may need to finish this step by hand to completely form the new side edge.

Step 9b

Step 10
 Mark where the new side edge extends beyond the panel perimeter.

Step 11
 Trim away and discard this excess material.

Step 12a
 Install field-cut panel.

Step 12b

Note:
 Be especially careful when field-cutting panels that do not butt to a wall.
