

# Assembly Instructions ■

## Chair Dolly Handle

January 2020

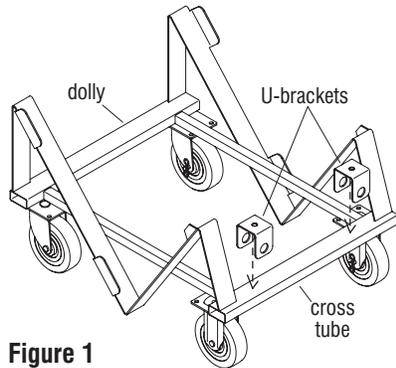

Figure 1

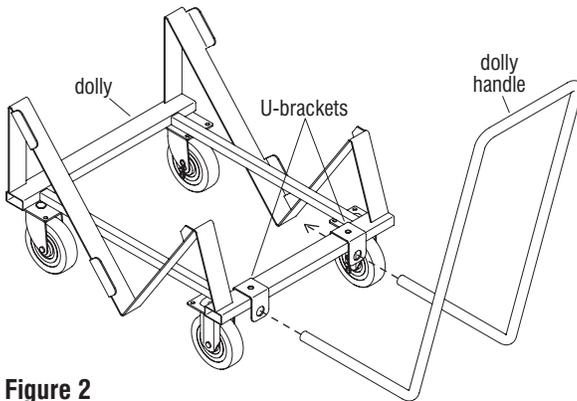

Figure 2

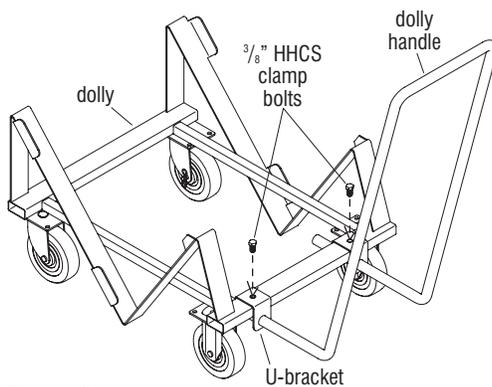

Figure 3

Assemble units as described herein only. To do otherwise may result in instability. All screws, nuts and bolts must be tightened securely and must be checked periodically after assembly. Failure to assemble properly, or to secure parts may result in assembly failure and personal injury.

### Tools Required

- $\frac{9}{16}$ " Wrench

1. Set two U-brackets over the rectangular cross brace of the chair dolly as illustrated (Figure 1).
2. Position the dolly handle as illustrated, then space the U-brackets to receive the open end of the dolly handle, and press the ends of the dolly handle through the openings in the two U-brackets, so the ends extend through the brackets (Figures 2 & 3).
3. With chairs stacked on the dolly, slide the handle in as far as possible, but leave clearance between the handle and stacked chairs. Then thread a  $\frac{3}{8}$ " clamp bolt into the top of each U-bracket and tighten to hold handle in position (Figure 3).
