SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Benches
Bench supports are robotically welded steel construction of 14-gauge tubular frame steel with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Benches are secured to steel plates with deep thread screws. Each split bench requires two plates. Full benches for 8' tables require two plates; full benches for 10' and 12' tables require three plates. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.
B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.
C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" o.d. 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is gravity operated for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of eight per table.

Casters
Large 4" diameter heavy-duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of the table top when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.
General
Tables ship fully assembled. Tables are listed to applicable UL standards and requirements by Underwriters Laboratories, Inc.

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.

• The absence of the □ indicates that no choice is required.

• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

A Select basic model.
Basic model includes base no. of table with codes for length of table, edge treatment and frame finish.

B Select edge style.
BN	- Flat vinyl T-edge
73P	- 3/4" 73P edge
PR	- Perfect edge

C Select height.
27	- 27" high
29	- 29" high

D Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

E Select surface edge color.
Refer to the **Product Color Options** page in this price list.

Edge color offerings are based on edge style selections.

F Select bench surface.
Refer to the **Product Color Options** page in this price list.

G Select bench edge color.
Refer to the **Product Color Options** page in this price list.
Edge color offerings are based on edge style selections.

H Select frame color.
Refer to the **Product Color Options** page in this price list.
(BL) Std-no upcharge, all other colors have $12 upcharge, see price column for Chrome upcharge

FINISH INFORMATION

Additional Laminate Offering
Additional laminates are available with two weeks extended leadtime and a $61 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. When additional laminates are specified, top surface and bench surface are the same (bench edge color will match surface edge color).

SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Split Benches
Bench supports shall be robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to the uprights. Benches are secured to the steel plates with deep thread screws. There shall be two plates for each split bench. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" o.d. 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:
A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.
B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of four per table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the end of the bench unit or outermost stool when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.

INFORMATION

Warranty

- Unitized all-steel frames provide superior stability and durability
- KI's exclusive combination pneumatic lift assist and torsional energy storage system results in a controlled, effortless folding. Also holds tables in a teepee position for easy cleaning
- Available in 8-stool model only
- Storage lock standard for added safety
- Gravity lock stabilizes tables in the open position and eliminates possibility of tables folding unexpectedly
- Listed to applicable UL standards and requirements by Underwriters Laboratories, Inc
- Dimensions include overall depth and width of table and seating
- Diameter of top is 60"

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The □ indicates that a choice is required.

• The absence of the □ indicates that no choice is required.

• Alpha-numeric characters in place of □ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.
Basic model includes base no. of table with codes for length of table, edge treatment, frame finish and stool material.

Ⓑ Select edge style.
BN - Flat vinyl T-edge
73P - 3/4" 73P edge
PR - Perfect edge

Ⓒ Select height.
27 - 27" high
29 - 29" high

Ⓓ Select surface finish.
Refer to the **Product Color Options** page in this price list.
Surface finish offerings are based on edge style selections.

Ⓔ Select surface edge color.
Refer to the **Product Color Options** page in this price list.

Edge color offerings are based on edge style selections.

Ⓕ Select stool color - Polypropylene (PY).
Refer to the **Product Color Options** page in this price list.

Ⓖ Select frame color.
Refer to the **Product Color Options** page in this price list.
(BL) Std-no upcharge, all other colors have $12 upcharge, see price column for Chrome upcharge

FINISH INFORMATION

Additional Laminate Offering
Additional laminates are available with two weeks extended leadtime and a $61 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern.

INFORMATION

Polypropylene Stool
High-impact polypropylene stools of heavy-duty construction, with ribs, reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter and fastens with screws.

SPECIFICATIONS

Lift Mechanism
Rectangular tables fold and open in one fluid motion, assisted by a torsional energy storage system. This ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling.

Shaped tables fold in one fluid motion without pneumatic or torsional energy assistance. Safety lock engages in the semi-open position to halt downward movement. Safety lock can be released from either side of the table.

Tops
Table tops are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard. A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bull-nose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames for Rectangular Tables without Seating
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. End leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" x 2" 14-gauge bottom tube. Center leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" round 14-gauge bottom tube. Center hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frames for Shaped Tables without Seating
Table frame is fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge angle steel, pierced to securely anchor the tops. Leg weldments are robotically wire-welded. Leg consists of 1" x 2" 14-gauge vertical tube and bottom tube, 1" round 14-gauge top tube and two support gussets for added strength. Center hinge plates are 7-gauge steel. Stretcher bars are 1" 7-gauge steel. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks for Rectangular Tables
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly.

KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Locks for Shaped Tables
Gravity lock with spring assist constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. Safety lock engages in a semi-open position to halt downward opening movement. Release of gravity lock is possible from either side of the table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of table top when table is in the open position. Casters are self-lubricating.

General
Tables ship fully assembled. Rectangular tables without seating are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

SPECIFICATIONS

Lift Mechanism
Tables fold and open in one fluid motion, assisted by a combination of pneumatic cylinders and a torsional energy storage system. This combination ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling. Torsion-bar-only assists or spring assists are not to be used.

Tops and Benches
Table tops and benches are solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard.   A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Benches
Bench supports are robotically welded steel construction of 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Benches are secured to steel plates with deep thread screws. There shall be three plates for each full bench. No field assembly required.

Stools
Stool supports are robotically welded steel construction consisting of a 14-gauge tubular frame with 6" square, heavy-duty 11-gauge steel plates welded to uprights. Poly stools are attached to the steel plate with deep thread screws. Thermoset hard plastic stools are attached with carriage bolts. No field assembly required.

Stools are one of the following:
A. Poly: High-impact polypropylene stools of heavy-duty construction with ribs to reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter.

B. Thermoset Hard Plastic: Highly durable thermoset hard plastic stool seats of molded melamine and wood flour mixture are available. Seats are scratch resistant with color permeating through seat. Stool is 13" diameter.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. Horizontal and vertical tubing is 1-1/4" OD 14-gauge steel. Hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant.

Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. KI's exclusive storage lock is gravity operated for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Casters
Large 4" diameter heavy-duty hard rubber swivel casters provide easy and safe maneuverability. When the table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the end of the bench unit or outermost stool when in the open position. Tamper-resistant caster covers are used to prevent the trapping of dirt, dust or food. Casters are self-lubricating.

Glides
For increased surface area and durability, non-marring 1.25" x 12" glides made of nylon plastic material are standard. Set of four per table.

General
Tables ship fully assembled. Tables are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

FINISH INFORMATION

Additional Laminate Offering
Additional laminates are available with two weeks extended leadtime and a $69 per table list upcharge. To specify additional laminates from the suppliers, use these designators followed by the supplier's color/pattern code:

Formica - LF/supplier's color pattern code
Nevamar - LN/supplier's color pattern code
Pionite - LP/supplier's color pattern code
Wilsonart - LW/supplier's color pattern code

KI's standard finish is the supplier's recommended finish for that color/pattern. When additional laminates are specified, top surface and bench surface are the same (bench edge color will match surface edge color).

INFORMATION

Polypropylene Stool
High-impact polypropylene stools of heavy-duty construction, with ribs, reinforce points of stress. Edges are rolled for comfort and strength. Front is textured and color permeates stool. White marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool. Stool is 13" diameter and fastens with screws.

T-Style Leg

SPECIFICATIONS

Lift Mechanism
Rectangular tables fold and open in one fluid motion, assisted by a torsional energy storage system. This ensures safety and ease of use through a controlled, effortless operation. Table stays in a teepee position for easy handling.

Shaped tables fold in one fluid motion without pneumatic or torsional energy assistance. Safety lock engages in the semi-open position to halt downward movement. Safety lock can be released from either side of the table.

Tops
Table tops are of solid core warp-resistant construction. Center core is 5/8" thick 45# high-density particleboard.   A .040 high-pressure laminate face is used for the top surface with a balanced high-pressure laminate backer for the bottom surface. Table tops are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 1-1/2" radius.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black vinyl bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

C. Perfect Edge: Made of 1/4" thick by 3/4" high cast black polyurethane. The Perfect Edge is mechanically and chemically bonded to the table core and chemically bonded to the laminate surface edge, providing a superior, permanently sealed barrier to moisture, dirt and bacteria penetration.

Frames for Rectangular Tables without Seating
Table frames are fabricated using a welded

unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge channel steel, pierced to securely anchor the tops. End leg and center leg assemblies are robotically wire-welded. End leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" x 2" 14-gauge bottom tube. Center leg weldment consists of 1" x 2" 14-gauge vertical tube, 1-1/4" round 14-gauge top tube and 1" round 14-gauge bottom tube. Center hinge plates are 7-gauge steel. Stretcher bars are 3/4" x 1-1/2" 14-gauge oval steel tubing. All legs operate from the unitized frame, not the table top.

Frames for Shaped Tables without Seating
Table frame is fabricated using a welded unitized construction, integrating all structural steel members into a self-supporting unit. The table top support apron is 11-gauge angle steel, pierced to securely anchor the tops. Leg weldments are robotically wire-welded. Leg consists of 1" x 2" 14-gauge vertical tube and bottom tube, 1" round

14-gauge top tube and two support gussets for added strength. Center hinge plates are 7-gauge steel.   Stretcher bars are 1" 7-gauge steel. All legs operate from the unitized frame, not the table top.

Frame Finish
Frame finish is one of the following:

A. Powder-Coated Finish: Epoxy powder coating is electrostatically applied. The dry coating is fused and cured in a baking oven to form a smooth, continuous film. Finish is chemical-resistant, hard, tough and chip/mar-resistant. Standard finish is black.

B. Chrome Finish: Bright and semi-bright duplex nickel chrome is applied to the frame in a twenty-two step process, creating a superior surface finish that is extremely resistant to staining, scuffing, scratching and corrosion.

Locks for Rectangular Tables
Gravity lock constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly.

KI's exclusive storage lock is spring loaded for automatic engagement and semi-concealed to prevent accidental release. Release of gravity and storage locks is possible from either side of the table.

Locks for Shaped Tables
Gravity lock with spring assist constructed of 3/8" solid steel rods engages automatically into slots in apron hinge, eliminating the possibility of folding unexpectedly. Safety lock engages in a semi-open position to halt downward opening movement. Release of gravity lock is possible from either side of the table.

Casters
Large 4" diameter heavy duty hard rubber swivel casters provide easy and safe maneuverability. When table is in use, casters lift off the floor to prevent table from rolling. To avoid tripping hazards, casters do not extend beyond the outer edge of table top when table is in the open position. Casters are self-lubricating.

Glides

For increased surface area and durability, non-marring 1.25" x 12" glides made of ABS plastic material are standard. Set of four per table.

General
Tables ship fully assembled. Rectangular tables without seating are listed with Underwriters Laboratories in compliance with testing for public safety (Mobile Folding Tables).

SPECIFICATIONS

Tops/Backs and Benches
Tops/backs and benches are of solid core 3/4" thick warp-resistant construction. Center core is 45 PCF high-density particleboard. A .030 high-pressure laminate face is used for the top surface with a .030 high-pressure laminate backer for the bottom surface. Table tops and benches are attached to the table frame with deep thread screws; expansion rivets are not to be used. Corners have a 2-1/2" radius. Tops measure 14-3/4" wide by 3/4" thick by the length of the bench.

Edges
Table top and bench edges are finished in one of the following:

A. Bullnose edge: (Flat vinyl T-edge) Edges are banded with an abrasion-resistant black bullnose molding. The barbed "T" design is inserted into a routed groove in the solid particleboard top and held in place with nails driven from the underside, spaced approximately 8-10" apart.

B. 73P Edge: Edges are banded with a 2mm flat polypropylene edge banding that is chemically bonded to the table or bench core.

Frames
Table frames are fabricated using a welded unitized construction, integrating all structural steel members and the ganging mechanism into a self-supporting unit. The top/back support apron is 18-gauge bent and welded steel tubing, using double tube construction for leg support vertical and leg support bottom cross tube. The main pivot folding action is heavy-duty 14-gauge steel tubing coupled with thick 11-gauge saddles. The lower leg base shall be welded to the leg assembly.

Frame Finish
Painted frame finish is non-chipping electrostatically applied and baked. Finish is black only.

Ganging Mechanism
Steel ganging mechanism is provided on all tables as standard, allowing two tables to be locked together into a common unit. Mechanism is located on end of foot for ease of operation.

Bench Support Foot Caps
Bench support foot caps are non-marring rubber.

Casters
Large 4" diameter hard rubber swivel casters, two locking and two non-locking, provide easy and safe maneuverability.

General
Convertible benches ship knocked down in two boxes for customer assembly (unassembled). Benches are listed with Underwriters Laboratories in compliance with testing for public safety (Folding Rollaway Tables).

HOW TO ORDER

Indicate the following information on order form:
1. Quantity of each item.
2. Model number, including options. See "How To Build a Model Number".
3. Any special service required.

Note: • The ☐ indicates that a choice is required.

• The absence of the ☐ indicates that no choice is required.

• Alpha-numeric characters in place of ☐ indicate that no other alternatives are available.

HOW TO BUILD A MODEL NUMBER

Ⓐ Select basic model.
   Basic model includes length of bench.

Ⓑ Select edge style.

BN	- Flat vinyl T-edge
73P	- 3/4" 73P edge

Ⓒ Height

27	- 27" high
29	- 29" high

Ⓓ Select surface finish.
   Refer to the **Product Color Options** page in this price list.

Ⓔ Select surface edge color.
   Refer to the **Product Color Options** page in this price list.
   Edge color offerings are based on edge style selections.

Ⓕ Frame Color

BL	- Black

Ⓖ Leg Finish

BLF	- Black leg finish
CHF	- Chrome leg finish; add $24

Uniframe tables have ample doorway clearance and can be moved in the safe, closed and locked position through standard door openings.

For safety and convenience, the storage lock engages automatically when the table is folded and can't move out of correct alignment like competitor' tables can. The lock release is easily accessible from either side of the table without a long reach under the unit.
Textured polypropylene stool seats are standard or choose the Thermoset Hard Plastic option. Thermoset Hard Plastic provides the ultimate seat for lasting appearance and cleaning simplicity.

T-legs increase knee room and seating capacity around the table and eliminate the need to straddle table leg uprights.
KI's exclusive combination pneumatic lift assist and torsional energy storage system results in a controlled, effortless folding operation. So much so, these tables are the easiest to operate...bar none!

Uniframe rectangular tables automatically stay in a teepee (semi-folded) position for safe, fast and easy floor cleaning. Just lift slightly, clean and push back down.

Uniframe rectangular tables provide sufficient clearance between top halves to prevent fingers from being caught or pinched. Pinch-free center hinges also assure safe operation.
KI's unique design stores stool seats parallel to the tabletop, discouraging children from climbing and minimizing dust build-up during storage.

Split benches have a generous 4-1/2" clearance between seats for greater comfort and easy access.

For non-rectangular units the semi-open safety lock prevents injury from downward opening by keeping the table in a semi-open position until fingers are out of the way.
KI attaches stools to a heavy, 11-gauge, metal plate before shipping. This provides greater strength, durability and stability than the competitors' plastic sleeve and pin style stools that require field installation. With polypropylene stools, white marks may occur on the stool top at attachment points but do not alter the structural integrity of the table or stool.

The exclusive caster support has a sleek tamper-resistant cover that won't trap dust, dirt or food and won't scuff shoes.
