

Connolly® 2.0

NATIONAL.

# Connolly 2.0

## LOUNGE COLLECTION

Connolly 2.0 includes additional features specifically designed to accommodate today's high-use applications in workplace, education, and health environments. Designed with a higher sit than original Connolly and an optional oversized arm cap with a finger pull overhang, Connolly 2.0 makes it easier for guests to sit in and exit the chair. Additional elements like a push-through clean out channel and metal wall saver leg option make it an ideal solution for spaces focused on user comfort, cleanability, facility maintenance, and aesthetics.

*"After launching Connolly, we heard the demand for a version that accommodates high cleanability needs. I designed Connolly 2.0 to include elements focused on meeting those specific needs while keeping the comfort of the Connolly series."*
