

HermanMiller
Headway™ Tables

Prepare for powerful meetings

Headway Tables

Set things in motion with Headway: conference and communal tables designed for seamless technology so teammates can connect, collaborate, and move ideas forward. Boasting an impressive array of shapes, finishes, configurations, and

postures, you can customize Headway to fit any office and aesthetic. From brainstorm to board room, Headway's sleek design and tech prowess make it an essential part of every meeting.

Abundant Choices

Headway's aesthetic versatility makes it a good look in every style of office, from traditional board rooms to modern conference rooms to lively project areas. With nearly endless choices for Headway's shape, height, and tech, it's easy to define and specify your perfect conference table. Thoughtful design details and finishes help it blend perfectly with the rest of the Herman Miller portfolio.

Seamless Cable Management

Headway's purposeful design neatly hides technology, routes wires, and tucks away outlets to provide sleek looks and on-demand power and data.

Designed for Third-Party Tech

Headway is designed to work with technology made by other manufacturers so you can create a meeting table with the right mix of tools for your needs. And because you can easily swap out or upgrade the technology, it will continue to serve as an adaptable platform for powerful meetings long into the future.

Surface cut-outs supply on-demand power and data and are designed to accommodate a variety of third-party tech components, such as cable retractor units.

Community Beyond the Conference Room

Gather people and ideas together at Headway communal tables. Accessible design and flexible functionality help make space for different people and diverse tasks, extending community across the workplace. With cohesive aesthetics and three height options, they're a natural place to touch down, meet up, or simply work side by side.

Statement of Line

Headway comes in a variety of height, shape, and base configurations, and can be easily customized to address different needs.
